Mathematics of Program Construction Dexter Kozen,Carron Shankland,2004-09-21 This volume contains the proceedings of MPC 2004 the Seventh International Conference on the

Mathematics of Program Construction This series of conferences aims to promote the development of mathematical principles and techniques that are demonstrably useful in the process of constructing computer programs whether implemented in hardware or software. The focus is on techniques that combine precision with conciseness enabling programs to be constructed by formal calculation. Within this theme the scope of the series is very diverse including programming methodology, program specification and transformation, programming paradigms, programming calculi and programming language semantics. The quality of the papers submitted to the conference was in general very high and the number of submissions was comparable to that for the previous conference. Each paper was refereed by at least four and often more committee members. This volume contains 19 papers selected for presentation by the program committee from 37 submissions as well as the abstract of one invited talk titled Static Checking for Java by Greg Nelson, Imaging Systems Department, HP Labs, Palo Alto, California. The conference took place in Stirling, Scotland. The previous six conferences were held in 1989 in Twente, The Netherlands; in 1992 in Oxford, UK; in 1995 in Kloster Irsee, Germany; in 1998 in Marstrand near Göteborg, Sweden; in 2000 in Ponte de Lima, Portugal; and in 2002 in Dagstuhl, Germany. The proceedings of these conferences were published as LNCS 375, 669, 947, 1422, 1837, and 2386 respectively.

Practical Aspects of Declarative Languages Bharat Jayaraman, 2004-06-14 This book constitutes the refereed proceedings of the 6th International Symposium on Practical Aspects of Declarative Languages, PADL 2004, held in Dallas, Texas, USA, in June 2004. The 15 revised full papers presented together with 2 invited papers were carefully reviewed and selected for presentation. All current aspects of declarative programming are addressed.

Programming Languages and Systems Daniel Le Metayer, 2003-08-01 ETAPS 2002 was the 14th instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised 5 conferences: FOSSACS, FASE, ESOP, CC, TACAS, 13 satellite workshops, ACL2, AGT, CMCS, COCV, DCC, INT, LDTA, SC, SFEDL, SLAP, SPIN, TPTS, and VISS. 8 invited lectures, not including those specific to the satellite events and several tutorials. The events that comprise ETAPS address various aspects of the system development process including specification, design, implementation, analysis, and improvement. The languages, methodologies, and tools which support these activities are all well within its scope. Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.

Generic Programming Roland Backhouse, Jeremy Gibbons, 2003-11-25 Generic programming attempts to make programming more efficient by making it more general. This book is devoted to a novel form of genericity in programs based on parameterizing programs by the structure of the data they manipulate. The book presents the following four revised and extended chapters first given as lectures at the Generic Programming Summer School held at the University of Oxford, UK, in August 2002: Generic Haskell

Practice and Theory Generic Haskell Applications Generic Properties of Datatypes Basic Category Theory for Models of Syntax *Proceedings of the Third ACM SIGPLAN International Conference on Functional Programming (ICFP '98)* ,1998
