

# 4 myths about cybersecurity in Startups

## Myth #1

We are not an interesting target for attackers

## Myth #2

Security requires a lot of money, we just don't have it for now

## Myth #3

If somebody will decide to hack us, they will make it happen anyways

## Myth #4

Since we are a small company, it's not that important if somebody hacks us. It will not affect our business or the damage will be minor

Protect your APIs and Web Applications

## Reality #1

99% of the threats are automated already, and there is an unofficial "market" that allows you to buy access, data, etc

## Reality #2

99% of the security depends on people like engineers who can easily pick this knowledge for free

## Reality #3

It's true only for governments and targets where the cost of attacks is not important. For the rest of businesses, it's about how much they should spend to hack you

## Reality #4

It will be valuable when you become bigger. All the cybersecurity incidents, data breaches, hacks, etc will affect your business even after several years.

**Cybersecurity for Executives in the Age of Cloud** Teri Radichel, 2020-03-08 With the rising cost of data breaches executives need to understand the basics of cybersecurity so they can make strategic decisions that keep companies out of headlines and legal battles Although top executives do not make the day to day technical decisions related to cybersecurity they can direct the company from the top down to have a security mindset As this book explains executives can build systems and processes that track gaps and security problems while still allowing for innovation and achievement of business objectives Many of the data breaches occurring today are the result of fundamental security problems not crafty attacks by insidious malware The way many companies are moving to cloud environments exacerbates these problems However cloud platforms can also help organizations reduce risk if organizations understand how to leverage their benefits If and when a breach does happen a company that has the appropriate metrics can more quickly pinpoint and correct the root cause Over time as organizations mature they can fend off and identify advanced threats more effectively The book covers cybersecurity fundamentals such as encryption networking data breaches cyber attacks malware viruses incident handling governance risk management security automation vendor assessments and cloud security

**RECOMMENDATION** As a former senior military leader I learned early on that my personal expertise of a subject was less important than my ability to ask better questions of the experts Often I had no expertise at all but was required to make critical high risk decisions under very tight time constraints In this book Teri helps us understand the better questions we should be asking about our data data systems networks architecture

development vendors and cybersecurity writ large and why the answers to these questions matter to our organizations bottom line as well as our personal liability Teri writes in a conversational tone adding personal experiences that bring life and ease of understanding to an otherwise very technical complex and sometimes overwhelming subject Each chapter breaks down a critical component that lends to a comprehensive understanding or can be taken individually I am not steeped in cyber but Teri s advice and recommendations have proven critical to my own work on Boards of Directors as well as my leadership work with corporate CISOs cybersecurity teams and C Suite executives In a time constrained world this is a worthy read Stephen A Clark Maj Gen USAF Ret AUTHOR Teri Radichel teriradichel is the CEO of 2nd Sight Lab a cloud and cybersecurity training and consulting company She has a Master of Software Engineering a Master of Information Security Engineering and over 25 years of technology security and business experience Her certifications include GSE GXPN GCIH GPEN GCIA GCPM GCCC and GREM SANS Institute gave her the 2017 Difference Makers Award for cybersecurity innovation She is on the IANS Institute for Applied Network Security faculty and formerly taught and helped with curriculum for cloud security classes at SANS Institute She is an AWS hero and runs the Seattle AWS Architects and Engineers Meetup which has over 3000 members Teri was on the original Capital One cloud team helping with cloud engineering operations and security operations She wrote a paper called Balancing Security and Innovation With Event Driven Automation based on lessons learned from that experience It explains how companies can leverage automation to improve cybersecurity She went on to help a security vendor move a product to AWS as a cloud architect and later Director of SaaS Engineering where she led a team that implemented the concepts described in her paper She now helps companies around the world with cloud and cyber security as a sought after speaker trainer security researcher and pentester
