**Heat Transfer XIII** B. Sundén, C. A. Brebbia, 2014-07-01 This book contains the proceedings of the thirteenth conference in the well established series on Simulation and Experiments in Heat Transfer and its applications **Structural Studies, Repairs and Maintenance of Heritage Architecture XIV** S. Hernández, 2015-07-13 Containing the proceedings of the 14th Conference on Studies Repairs and Maintenance of Heritage Architecture STREMAH 2015 this book provides the necessary scientific knowledge required to formulate regulatory policies and to ensure effective ways of preserving the architectural heritage First held in 1989 the STREMAH conference attracts an extensive range of quality contributions from scientists architects engineers and restoration experts from all over the world dealing with various aspects of heritage buildings The conference proceedings cover a wide range of topics related to the historical aspects and the reuse of heritage buildings as well as technical issues on the structural integrity of different types of buildings such as those constructed with materials as varied as iron and steel concrete masonry wood or earth Material characterisation techniques are also addressed including non destructive tests via computer simulation Other topics include Surveying and monitoring Performance and maintenance Modern 19th 20th century heritage Maritime heritage Simulation and modelling Material characterisation New technologies or materials Corrosion and material decay Seismic vulnerability Assessment and re use of heritage buildings Heritage and tourism Social and economic aspects in heritage Guidelines codes and regulations for heritage Heritage management Defence heritage Industrial heritage Transportation heritage *Mechanical, Thermal and Hygric Properties of Buildings Materials* Eva Vejmelková, Jan Zatloukal, Pavel Reiterman, 2014-07-28 Selected peer reviewed papers from the 1st International Doctoral Conference Advanced Materials IDC AM July 23 25 2014 Zahr dky Czech Republic

**The Path to Green Concrete** Jorge de Brito, Francisco Agrela, Rui Vasco Silva, 2024-06-04 Those who are working in the manufacture and development of sustainable construction materials need to have a detailed understanding of the many different processes that are available to make sustainable concrete and cement New Trends in Sustainable Concrete and Cement will enlighten the scientific community on recent developments in this field Within the volume world renowned experts summarize recent research findings covering key topics such as alkali activated materials using aluminosilicate waste precursors use of novel cost effective and eco efficient supplementary cementitious materials state of the art characterization techniques and assessment methodologies advances on the use of biomass ashes steel slags and waste glass the role of carbon capture in the production of concrete and mortar development of eco efficient composites for specialized applications recycling of the fine fraction of construction and demolition wastes and sustainable self healing concrete The book will be a valuable reference resource for academic and industrial researchers civil and structural engineers manufacturers and other construction professionals working in the development of sustainable construction materials Presents recent developments on eco efficient cementitious composites Places an emphasis on complete replacement of

cement with the use of alkali activated materials Includes novel enhancing techniques along with 3D printing and characterization methods

**Mechanical and Materials Engineering of Modern Structure and Component Design**  
Andreas Öchsner, Holm Altenbach, 2015-06-06 This book presents the latest findings on mechanical and materials engineering as applied to the design of modern engineering materials and components The contributions cover the classical fields of mechanical civil and materials engineering as well as bioengineering and advanced materials processing and optimization The materials and structures discussed can be categorized into modern steels aluminium and titanium alloys polymers composite materials biological and natural materials material hybrids and modern nano based materials Analytical modelling numerical simulation state of the art design tools and advanced experimental techniques are applied to characterize the materials performance and to design and optimize structures in different fields of engineering applications

Energy and Sustainability VI W.F. Florez-Escobar, C.A. Brebbia, F. Chejne, F. Mondragon, 2015-09-02 Diverse topics covered in this title containing the conference proceedings of the 6th International Conference on Energy and Sustainability involve interdisciplinary cooperation to arrive at optimum solutions including materials energy networks new energy resources storage solutions waste to energy systems smart grids and many others Energy and Sustainability VI focuses on energy matters and the need to respond to the modern world s dependency on conventional fuels The continuous use of fossil fuels has generated an increasing amount of interest in renewable energy resources and the search for sustainable energy policies This book also presents the following topics Sustainable Energy Production Energy in the Built Environment Energy Production Energy Networks Smart Grids and Metering Energy Storage and Policies Shale Oil and Gas Oil Sands Processes CO2 Capturing and Management Energy Management Imbedded Energy in Manufacturing Energy and Transportation Energy Efficiency Renewable Energy Resources Biomass and Biofuels Waste to Energy The Future of Nuclear Energy Environmental Risk Greener Power Plant Technologies Optimization of Conventional Energy Resources Advances in Energy Production
