Medical School J. Taylor Shortsleeve MD,2022-12-19 Have you ever wondered what medical school is like Do you wish you had something to help you weigh the options between medical school a doctorate degree or some other field of work Do you want to know more about what to expect in medical school so that you can tailor your resume and applications toward a reality rather than an expectation In this book Taylor goes through the process of getting into medical school to graduating from it He explains the physical steps involving the courses you ll take to the board exams you ll study for He explores the emotions involved in each step and what transformations occur as you collect new experiences along the way He tells you what it takes and explains the various benefits and drawbacks of MD versus DO U S versus Caribbean and doctor versus other positions within healthcare Inspiration for the book arose from Taylor s experience with the lack of tangible resources available to high school and college students while thinking about and applying to medical school After graduating in March of 2020 and starting his career in the COVID 19 ICU he set out to make sure the next generation of medical students has a better understanding of the process before committing themselves to a singular track Medical school is a great option for those who understand what it takes and what to expect For many it takes people by surprise Patients need doctors who are lively enriched in their work and engaged with one another in collegial spirit The best way to become the best doctor is to know about the process before it takes you by surprise

Technologies in Biomedical and Life Sciences Education Harry J. Witchel,Michael W. Lee,2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they

address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come **Кхмерско-русский словарь** IꞑUꞑrii
