has not received extensive research attention until recently Ongoing mathematics curriculum changes in many education  
systems call for further research and sharing of effective curriculum policies and practices that can help lead to the  
improvement of school education This book provides a unique international perspective on diverse curriculum issues and  
practices in different education systems offering a comprehensive picture of various stages along curriculum transformation  
from the intended to the achieved and showing how curriculum changes in various stages contribute to mathematics  
teaching and learning in different educational systems and cultural contexts The book is organized to help readers learn not  
only from reading individual chapters but also from reading across chapters and sections to explore broader themes  
including Identifying what is important in mathematics for teaching and learning in different education systems  
Understanding mathematics curriculum and its changes that are valued over time in different education systems Identifying  
and analyzing effective curriculum practices Probing effective infrastructure for curriculum development and implementation  
Mathematics Curriculum in School Education brings new insights into curriculum policies and practices to the international  
community of mathematics education with 29 chapters and four section prefaces contributed by 56 scholars from 14 different  
education systems This rich collection is indispensable reading for mathematics educators researchers curriculum developers  
and graduate students interested in learning about recent curriculum development research and practices in different  
education systems It will help readers to reflect on curriculum policies and practices in their own education systems and also

inspire them to identify and further explore new areas of curriculum research for improving mathematics teaching and learning
