Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Introduction

0.1 Background

It is estimated by the International Labour Organization (ILO) that there are over 2.3 million deaths every year as a result of work activities, of which close to 2 million are due to ill-health, with the remainder being due to fatal accidents.

An organization is responsible for the health and safety of its workers and that of other persons under its control who are performing work on its behalf, including promoting and protecting their physical and mental health.

The adoption of an occupational health and safety (OH&S) management system can enable an organization to improve its OH&S performance in the enhancement of health and safety at work and to manage its OH&S risks.

NOTE 1 The term "occupational safety and health" ("OSH") has the same meaning as "occupational health and safety" ("OH&S").

NOTE 2 The term "worker" is defined to include both managerial and non-managerial persons
