

## SEPARATING THE GENERATOR FROM THE ENGINE

Figure 9

Remove the fan (1), the brackets of the supports (4) and the support (3).

Separate the generator from the engine as follows:

- disconnect the wiring (10) from the engine at each of its points of connection with the parts of the engine: starter motor, alternator, various sensors, etc. Then fasten it appropriately to the control panel (9) so as not to hinder operations when separating the two assemblies;

- remove the safety grilles (5) by undoing the fasteners (7), unscrew all the nuts (6) connecting the generator (8) to the housing of the engine flywheel;
- block the generator suitably and separate it from the engine.
