Beatty,1994 Secondary Textbook Review ,1988 This book is intended as a resource for teachers and curriculum developers who select textbooks for secondary English courses It includes a compilation of 32 factual textbook reviews obtained from the application of a review instrument which was based on the California Model Curriculum Standards Grades Nine through Twelve English Language Arts and the English Language Arts Framework for California Public Schools Kindergarten through Grade Twelve The instrument described in the book was applied to selected English composition grammar and reading literature textbooks The book suggests that the resulting reviews can be used by teachers as a screening device to reduce the number of books they review and pilot studies they conduct thus educators will have more time to do in depth reviews of two or three textbooks which appear to match their course requirements and their students academic needs The book also states that the review instrument can be adapted by districts to reflect their own English objectives and test results Every review in the book includes two parts and a publisher s description which appears in the Appendix a section which depicts the extent to which the emphasis on content and process is given to each of the topics in the textbooks reviewed and a section which includes topics on content and processes which might be found only in teachers editions The book does not make assessments regarding the quality of the books reviewed but rather provides information which teachers may find useful in making quality judgments and selecting specific textbooks for English

Catalog of Books** ,1996 **Fireflies** David P. Owen, Jr.,2017-08-24 Fireflies is a book about how writing poetry can help us explore memory and identity and it is also a book of poetry that explores memory and identity This work is an example of the liminal scholarship advocated in *The Need for Revision* 2011 by the same author occupying a space in the academic world s windows and doorways not exactly in any one field but rather in the spaces between where the inside and outside commingle it seeks to trouble the boundaries between teacher and writer critic and artist writer and reader and teacher and student in a way from which all parties might benefit Fireflies aims for a different kind of scholarship and hopes to offer new ways for teachers to be professional and academic The second section of the book is a full length poetry text the author s own exploration of the notions that people who teach writing should also be writers and that poetry is more something you do than something you are The book says we should write poems not because of some inborn gift for it but because the act of writing poetry is good for us and helps us understand ourselves better it is a book written in the hopes that other books will be written Maybe by you David Owen has taken his understanding of currere the root of curriculum to a new level with his demonstration of the value of reading and writing poetry He argues that writing poetry develops an attitude of adventure into everydayness As his first chapter *Songs of Ourselves* suggests we all can be Whitman s if we take up our pens to celebrate what lives around us as well as in us Owen demonstrates this theory with a calendar of poems he wrote that share small frozen moments of the seasons of a year Connecting his memories with forays into night skies and fireflies and the fractals that God makes David Owen s poetic
