The God Debaters Adrian Rosenfeldt,2022-05-04 This book examines the post 9 11 God debate in the West Through a close study of prominent English God debaters Richard Dawkins Karen Armstrong Christopher Hitchens and Terry Eagleton Adrian Rosenfeldt demonstrates that New Atheist and religious apologist ideas and arguments about God science and identity are driven by mythic autobiographical narratives and Protestant or Catholic cultural heritage This study is informed by criticism of the New Atheist polemic as being positivistic and the religious apologists as propagating sophisticated theology In both cases the God debaters are perceived as disassociating themselves from human lived experience It is through reconnecting the God debaters intellectual ideas to their cultural and social background that the God debate can be grounded in a recognisable human reality that eludes reductive distinctions and disembodied abstractions

tremendous advantages over other species throughout our evolution. However, this capability comes with a curse. By five to ten years of age, all humans know where they are heading to the grave. In *Mortals*, Rachel Menzies and Ross Menzies, both acclaimed psychologists whose life's work has focused on death anxiety, examine all the major human responses to death across history. From the development of religious systems denying the finality of death to immortality projects involving enduring art, architecture, and literature, some of the consequences of our fear of death have been glorious, while others have been destructive, leading to global conflicts and genocide. Looking forward, *Mortals* hypothesizes that worse could be to come: our unconscious dread of death has led to rampant consumerism and overpopulation, driving the global warming and pandemic crises that now threaten our very existence. In a terrible irony, *Homo sapiens* may ultimately be destroyed by our knowledge of our own mortality. A fascinating tour of our species' attempts across millennia to come to terms with mortality, *Mortals* offers a stunning glimpse into what our fear of death means for our future. A must read.
