Narration Identity And Historical Consciousness Making Sense Of History:

Narration, Identity, and Historical Consciousness Jürgen Straub, 2005 Until now psychology has barely dealt with the topics of historical consciousness and historical thought The contributions in this volume seek to remedy this **Time and History** Jörn Rüsen, 2008-01-01 This series aims at bridging the gap between historical theory and the study of historical memory as well as western and non western concepts for which this volume offers a particularly good example It explores cultural differences in conceptualizing time and history in countries such as China Japan and India as well as pre modern societies **History** Jörn Rüsen, 2005-01-01 Without denying the importance of the postmodernist approach to the narrative form and rhetorical strategies of historiography the author one of Germany s most prominent cultural historians argues here in favor of reason and methodical rationality in history He presents a broad variety of aspects factors and developments of historical thinking from the 18th century to the present thus continuing in exemplary fashion the tradition of critical self reflection in the humanities and looking at historical studies as an important factor of cultural orientation in practical life

A Museum Studies Approach to Heritage Sheila Watson, Amy Jane Barnes, Katy Bunning, 2018-10-08 Heritage s revival as a respected academic subject has in part resulted from an increased awareness and understanding of indigenous rights and non Western philosophies and practices and a growing respect for the intangible Heritage has thus far focused on management tourism and the traditionally heritage minded disciplines such as archaeology geography and social and cultural theory Widening the scope of international heritage studies A Museum Studies Approach to Heritage explores heritage through new areas of knowledge including emotion and affect the politics of dissent migration and intercultural and participatory dimensions of heritage Drawing on a range of disciplines and the best from established sources the book includes writing not typically recognised as heritage but which nevertheless makes a valuable contribution to the debate about what heritage is what it can do and how it works and for whom Including heritage perspectives from beyond the professional sphere the book serves as a reminder that heritage is not just an academic concern but a deeply felt and keenly valued public and private practice This blending of traditional topics and emerging trends established theory and concepts from other disciplines offers readers international views of the past and future of this growing field A Museum Studies Approach to Heritage offers a wider more current and more inclusive overview of issues and practices in heritage and its intersection with museums As such the book will be essential reading for postgraduate students of heritage and museum studies It will also be of great interest to academics practitioners and anyone else who is interested in how we conceptualise and use the past *Doing Conceptual History in Africa* Axel Fleisch, Rhiannon Stephens, 2018-02-21 Employing an innovative methodological toolkit *Doing Conceptual History in Africa* provides a refreshingly broad and interdisciplinary approach to African historical studies The studies assembled here focus on the complex role of language in Africa s historical development with a particular emphasis on pragmatics and semantics From precolonial dynamics of wealth and poverty to

the conceptual foundations of nationalist movements each contribution strikes a balance between the local and the global engaging with a distinctively African intellectual tradition while analyzing the regional and global contexts in which categories like work marriage and land take shape Divining History Jayne Svenungsson,2016-08-01 For millennia messianic visions of redemption have inspired men and women to turn against unjust and oppressive orders Yet these very same traditions are regularly decried as antecedents to the violent and authoritarian ideologies of modernity Informed in equal parts by theology and historical theory this book offers a provocative exploration of this double edged legacy Author Jayne Svenungsson rigorously pursues a middle path between utopian arrogance and an enervated postmodernism assessing the impact of Jewish and Christian theologies of history on subsequent thinkers and in the process identifying a web of spiritual and intellectual motifs extending from ancient Jewish prophets to contemporary radicals such as Giorgio Agamben and Slavoj Zizek *Perspectives on the Entangled History of Communism and Nazism* Klas-Göran Karlsson,Johan Stenfeldt,Ulf Zander,2015-07-15 The collective work deals with the problems of if how and why the histories of German Nazism and Soviet Communism should and could be situated within one coherent narrative As historical phenomena can Communism and Nazism fruitfully be compared to each other Do they belong to the same historical contexts Have they influenced reacted to or learned from each other Are they interpreted represented and used together by posterity The background of the book is twofold One is external There is an ongoing debate about the historical entanglements of Communism and Nazism especially about Auschwitz and Gulag respectively Our present fascination with the evil history of genocide has situated the Holocaust as the borderline event in Western historical thinking The crimes against humanity perpetrated by the Soviet Communist regime do not have the same position but are considered more urgent in the East and Central European states that were subdued by both Nazi and Communist regimes The other internal background is to develop an analytical perspective in which the comnaz nexus can be understood Using a complex approach the authors investigate Communist and Nazi histories as entangled phenomena guided by three basic perspectives Focusing on roots and developments a genetic perspective highlights historical process oriented connections A structural perspective indicates an attempt to narrow down operational parallels of the two political systems in the way they handled ideology to construct social utopia used techniques of terror etc A third perspective is genealogical emphasizing the processing and use of Communist and Nazi history by posterity in terms of meaning and memory What past is worth remembering celebrating debating but also distorting and forgetting The chapters of the book address phenomena such as ideology terror secular religion museum exhibits and denial *American Book Publishing Record* ,2005 Making Sense of Global History Sølvi Sogner,2001 Historians task has always been to make sense of the world This book presents selected papers dealing with the status of global history cultural contacts between the continents over the centuries the manifold construction and division of time and with the use and misuse of history worldwide **History and Theory** ,1990 Covers critical philosophy of history cause
