Fuzzy and Neural: Interactions and Applications James J. Buckley, Thomas Feuring, 2013-06-05 The primary purpose of this book is to present information about selected topics on the interactions and applications of fuzzy neural Most of the discussion centers around our own research in these areas Fuzzy neural can mean many things 1 approximations between fuzzy systems and neural nets Chapter 4 2 building hybrid neural nets to equal fuzzy systems Chapter 5 3 using neural nets to solve fuzzy problems Chapter 6 4 approximations between fuzzy neural nets and other fuzzy systems Chapter 8 5 constructing hybrid fuzzy neural nets for certain fuzzy systems Chapters 9 10 or 6 computing with words Chapter 11 This book is not intend to be used primarily as a text book for a course in fuzzy neural because we have not included problems at the end of each chapter we have omitted most proofs given in the references and we have given very few references We wanted to keep the mathematical prerequisites to a minimum so all longer involved proofs were omitted Elementary differential calculus is the only prerequisite needed since we do mention partial derivatives once or twice

Introduction to Neuro-Fuzzy Systems
Robert Fuller, 2013-06-05 Fuzzy sets were introduced by Zadeh 1965 as a means of representing and manipulating data that was not precise but rather fuzzy Fuzzy logic provides an inference morphology that enables approximate human reasoning capabilities to be applied to knowledge based systems The theory of fuzzy logic provides a mathematical strength to capture the uncertainties associated with human cognitive processes such as thinking and reasoning The conventional approaches to knowledge representation lack the means for representing the meaning of fuzzy concepts As a consequence the approaches based on first order logic and classical probability theory do not provide an appropriate conceptual framework for dealing with the representation of commonsense knowledge since such knowledge is by its nature both lexically imprecise and noncategorical The development of fuzzy logic was motivated in large measure by the need for a conceptual framework which can address the issue of uncertainty and lexical imprecision Some of the essential characteristics of fuzzy logic relate to the following 242 In fuzzy logic exact reasoning is viewed as a limiting case of approximate reasoning In fuzzy logic everything is a matter of degree In fuzzy logic knowledge is interpreted a collection of elastic or equivalently fuzzy constraint on a collection of variables Inference is viewed as a process of propagation of elastic constraints Any logical system can be fuzzified There are two main characteristics of fuzzy systems that give them better performance for specific applications

Compensatory Genetic Fuzzy Neural Networks and Their Applications

Yan-Qing Zhang, Abraham Kandel, 1998 This book presents a powerful hybrid intelligent system based on fuzzy logic neural networks genetic algorithms and related intelligent techniques The new compensatory genetic fuzzy neural networks have been widely used in fuzzy control nonlinear system modeling compression of a fuzzy rule base expansion of a sparse fuzzy rule base fuzzy knowledge discovery time series prediction fuzzy games and pattern recognition This effective soft computing system is able to perform both linguistic word level fuzzy reasoning and numerical data level information processing The book also proposes various novel soft computing techniques
