**Playful Wearables** Oguz Buruk, Ella Dagan, Katherine Isbister, Elena Marquez Segura, Theresa Jean Tanenbaum, 2024-01-02 An expert introduction to the world of playful wearables and their design with a wide range of engaging examples case studies and exercises This pioneering introduction to the world of wearable technology takes readers beyond the practical realm think Fitbits Apple Watches and smartglasses to consider another important side of the technology the playful Playful Wearables offers an engaging account of what playful wearables are why they matter how they work how they re made and what their future might hold The book s authors draw on decades of experience in design development and research to offer real world examples exercises and implications showing how this kind of wearable tech can introduce an invaluable element of play into our everyday lives As wearable technology emerges in the ecology of costume and fashion the authors consider its intimate connection to identity and culture And they look at the ways in which playful wearables when smoothly integrated into everyday social experiences support social interaction The book then moves on to the mechanics of playful wearables from design strategies and frameworks to specific methods and game design patterns All of these elements point to possibilities beyond the realm of games and dedicated play as the value and uses of playful wearables in the larger world of self society and culture become ever more apparent [Exploring Young Children's Ideas about Wearable Technology](#) Bridgette Atkins, 2017 This case study which forms a part of the Kids Creative Storyworlds

and Wearables project explores children's perspectives on wearable technology through their stories and other creative ideas inspired by wearable technology. Five children between the ages of four and seven were each given a smartwatch and were interviewed three times over the span of four weeks. Using a multi-method approach inspired by the Mosaic approach to ethnography (Clark, Clark, 2005) and social semiotics (Kress and van Leeuwen, 2006; Kress, 1997), children were invited to share their ideas in a variety of ways: face-to-face discussion, oral storytelling, written text, drawings. This research viewed children as meaning makers and sign makers. Results supported and extended elements of Papert's constructionist learning theory and Sutton-Smith's play as a viability variable theory (2008) and provided novel insights relevant to formal education practices. Empowerment is a key theme that emerged from this case study.
