

# Basic Biological Principles

## Standards:

- Describe the characteristics of life shared by all organisms.
- Compare the cellular structures and their functions in prokaryotic and eukaryotic cells.

**Cell Theory**

1. All living things are made of cells.
2. Cells are the basic unit of structure and function in living things.
3. Cells come from pre-existing cells.

**Endosymbiosis**

- A theorized process in which early eukaryotic cells were formed from simpler prokaryotes.
- Some organelles, such as mitochondria and chloroplasts, are believed to be evolved prokaryotes that now exist inside eukaryotes.

Earth is home to an incredible amount of biodiversity, however all living things (whether prokaryotic OR eukaryotic) share common characteristics:

1. All living things are made of cells.
2. All living things exhibit homeostasis (constant internal conditions).
3. All living things require energy for metabolism (break down & synthesis of substances).
4. All living things respond to their environment (stimuli).
5. All living things grow and develop.
6. All living things reproduce and pass on their DNA (genetic material) to their offspring.
7. All living things adapt and evolve (changes in DNA over multiple generations).

Cells are the smallest, most basic unit of life. There are two types of cells that make up all living things...eukaryotic cells and prokaryotic cells.

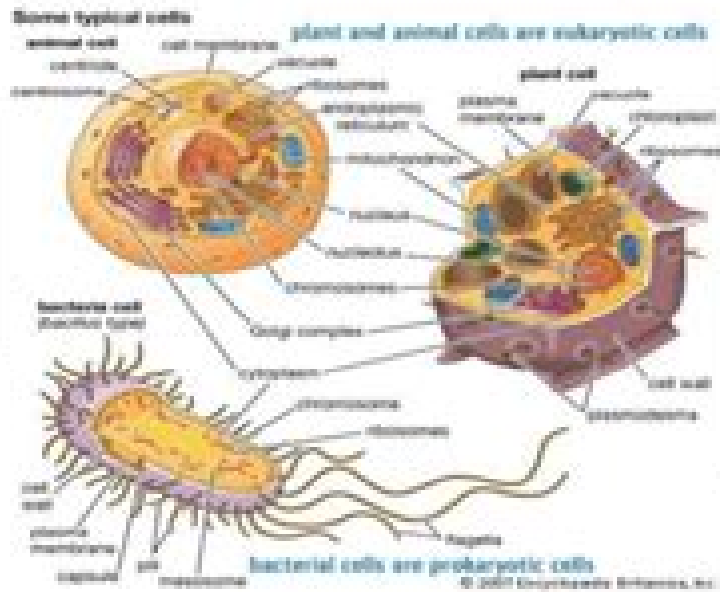

All cells have common components:

- Cytoplasm
- DNA (Genetic material)
- Plasma (cell) membrane
- Ribosomes

**Differences between prokaryotic and eukaryotic cells:**

	Prokaryotic Cells	Eukaryotic Cells
# of cells:	single	single or multi
size:	usually extremely tiny	varies much less
organelles:	absent, not membrane-bound	many, membrane-bound
DNA:	single circular chromosome attached to cell wall	linear chromosomes in a nucleus floating in the center of the cell
examples:	bacteria	protists, fungi, plants, animals

Membrane-bound organelles are made of biological macromolecules, such as proteins, lipids, carbohydrates and nucleic acids. These organelles carry out specialized functions within cells. (See the chart of organelles on the next page.)

**Animal Cells**

- No cell walls
- No chloroplasts
- Multiple small vacuoles
- Contain lysosomes
- Contain centrioles

**Plant Cells**

- Contain cell wall
- Contain chloroplasts
- Large central vacuole
- No lysosomes
- No centrioles

## **Basic Biology Study Guide:**

Basic Biology Study Guide: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
