**Basic Concepts Of Inorganic Chemistry** Singh,2009-09 *Global Basics: Inorganic and Organic Chemistry* James Algret,Basic School,2020-09-23 Everything you need to know about inorganic and organic chemistry The special position of carbon is based on the fact that the carbon atom has four bonding electrons allowing it to form non polar bonds with one to four other carbon atoms This can result in linear or branched carbon chains as well as carbon rings which are connected with hydrogen and other elements mainly oxygen nitrogen sulfur phosphorus at the non carbon bond electrons This can lead to large and very large molecules e g homo and heteropolymers and explains the huge variety of organic molecules Of the silicon which is also tetravalent there are also a large number of compounds but by far not such a variety The properties of organic substances are very much determined by their respective molecular structure Even the properties of simple organic salts such as acetates are clearly determined by the molecular shape of the organic part There are also many isomers i e compounds with the same overall composition molecular formula but different structure structural formula In contrast molecules in inorganic chemistry usually consist of only a few atoms where the general properties of solids crystals and or ions come into play However there are also polymers that do not contain carbon or only in subgroups e g the silanes Organic synthesis strategies differ from syntheses in inorganic chemistry because organic molecules can usually be built up piece by piece About 60% of chemists in Germany and the USA have chosen organic chemistry as their main subject

*Essentials of Inorganic Chemistry* Katja A. Strohfeldt,2014-12-30 A comprehensive introduction to inorganic chemistry and specifically the science of metal based drugs *Essentials of Inorganic Chemistry* describes the basics of inorganic chemistry including organometallic chemistry and radiochemistry from a pharmaceutical perspective Written for students of pharmacy and pharmacology pharmaceutical sciences medicinal chemistry and other
