Beyond Freedom and Dignity Burrhus Frederic

Skinner, 2002-03 In this profound and profoundly controversial work a landmark of 20th century thought originally published in 1971 B F Skinner makes his definitive statement about humankind and society Insisting that the problems of the world today can be solved only by dealing much more effectively with human behavior Skinner argues that our traditional concepts of freedom and dignity must be sharply revised They have played an important historical role in our struggle against many kinds of tyranny he acknowledges but they are now responsible for the futile defense of a presumed free and autonomous individual they are perpetuating our use of punishment and blocking the development of more effective cultural practices Basing his arguments on the massive results of the experimental analysis of behavior he pioneered Skinner rejects traditional explanations of behavior in terms of states of mind feelings and other mental attributes in favor of explanations to be sought in the interaction between genetic endowment and personal history He argues that instead of promoting freedom and dignity as personal attributes we should direct our attention to the physical and social environments in which people live It is the environment rather than humankind itself that must be changed if the traditional goals of the struggle for freedom and dignity are to be reached **Beyond Freedom and Dignity** urges us to reexamine the ideals we have taken for granted and to consider the possibility of a radically behaviorist approach to human problems one that has appeared to some incompatible with those ideals but which envisions the building of a world in which humankind can attain its greatest possible achievements **Dialectical Readings** Stephen N. Dunning, 2010-11-01 **Religious Thought and the Modern**

Psychologies Don S. Browning, Terry D. Cooper, *Religious Thought and the Modern Psychologies* has pioneered the broader and deeper critique of psychological theories and practice Informed by hermeneutical theory Browning's widely acclaimed work drew much needed attention to the ethical and metaphysical even religious assumptions that underlie present day psychology It has been deeply influential in many social sciences in addition to the fields of pastoral counseling and practical theology In this much needed second edition Browning and his new co author show how the field of social science has indeed grasped and appropriated the hermeneutical approach though with only slight appreciation of the religious dimensions of the social scientific endeavor Browning and Cooper provide a completely new first chapter newly situating the discussion and update the core chapters of the book They also add two new chapters carrying the dialogue on with three new psychotherapeutic theorists then with new evangelical writers on the relation of theology and psychology This new edition

like its predecessor will set the stage for the religion psychology dialogue for years to come Threads of Life Richard Freadman, 2001-02 Many autobiographers share profound questions about human life with their readers questions like To what extent was my life imposed on me To what extent did I bring it about through particular choices and actions through the activity of my own will Indeed the issue of the will is central to autobiographical writing and some of the greatest autobiographies give extended consideration to the will its nature its powers its limitations the forms of freedom constraint and expression it finds in various cultures its role in particular human lives In this new study unprecedented in subject and scope Richard Freadman offers the first sustained account of how changing theological philosophical and psychological accounts of the human will have been reflected in the writing of autobiography and of how autobiography in its turn has helped shape various understandings of the will Early chapters trace narrative representations of the will from antiquity the Greeks and Augustine to postmodernism Derrida and Barthes with particular emphasis on late modernity s culture of the will Later chapters then present detailed and powerfully original readings of autobiographical texts by Louis Althusser Roland Barthes B F Skinner Ernest Hemingway Simone de Beauvoir Arthur Koestler Stephen Spender and Diana Trilling Freadman s interdisciplinary approach to autobiography and the will includes a theoretical defense of the view that autobiographers are in varying degrees agents in their own texts Threads of Life argues that late modernity has inherited deeply conflicted attitudes to the will Freadman suggests that these attitudes now deeply embedded in contemporary cultural discourse need reexamining In this he contends reflective autobiography has an important part to play **Law, Power, and Personal Freedom** Lionel H. Frankel, 1975 **Science and Religion** Holmes Rolston, III, 2011-01-15 This landmark book first published in 1987 is now back in print with a new introduction by its award winning author An interdisciplinary approach to the central themes of scientific and religious thought this book was widely heralded upon its publication for the richness and depth of its contribution to the science and religion dialogue notable for its breadth and depth filled with admirably argued and powerfully presented treatments of critical issues Joseph Pickle Colorado College Zygon Journal of Religion and Science a superb and subtle book David Foxgrover Christian Century a monumental work T he book is truly outstanding John H Wright Jesuit School of Theology Berkeley Theological Studies Rolston s presentation of the methods of science along with up to date summaries of the main achievements of the various sciences is commendable for its clarity and critical acumen Choice According to Holmes Rolston III there are fundamental questions that science alone cannot answer these questions are the central religious questions He uses the scientific method of inquiry to distill key issues from science and then he integrates them in a study that begins with matter and moves through life mind culture history and spirit Incorporating religious and scientific worldviews he begins with an examination of two natural sciences physics and biology He then extrapolates examples from two human sciences psychology and sociology Next he moves to the storied universe and world history raising and addressing religious questions Never in the histories of science and religion have the opportunities been

greater for fertile interaction between these fields with mutual benefits to both states Rolston The re publication of this book provides current researchers and students in the field an invaluable timeless methodological resource The new introduction offers updated insights based on new scientific research

Beyond Freedom and Dignity. (Phonotape). Burrhus Frederic Skinner,1972

Sartre and Psychoanalysis Betty Cannon,1991 Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition Drawing upon Sartre s work as well as her own experiences as a practicing therapist she shows that Sartre was a fellow traveler who appreciated Freud s psychoanalytic achievements but rebelled against the determinism of his metatheory The mind Sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as Freud s work suggested Sartre advocated an existentialist psychoanalysis based on human freedom and the self s ability to reshape its own meaning and value Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs By comparing Sartre with Freud and influential post Freudians like Melanie Klein Otto Kernber Margaret Mahler D W Winnicott Heinz Kohut Harry Stack Sullivan and Jacques Lacan she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory In the process she adds a new dimension to our understanding of Sartre and his place in twentieth century philosophy
