configurations produce meaning What are alternative modes of knowledge production How do these change our
understanding of architectural knowledge Featuring essays from an international range of scholars the book accepts that
everything about the production of architecture has social significance It focuses on two areas firstly relationships of spatial
configuration form order and classification secondly the interaction of architecture and these notions with other areas of
knowledge such as literature inscriptions interpretations and theories of classification ordering and invention Moving beyond
perspectives which divide architecture into either an aesthetic or practical art the authors show how buildings are informed
by intersections between site and content space and idea thought and materiality architecture and imagination Presenting
illustrated case studies of works by architects and artists including Amale Andraos Dan Wood OMA Koen Deprez and John

Emmons,Marcia Feuerstein,Negar Goljan,2025-06-30 Finishing in Architecture Polishing Completing Ending explores the
topic of finishing and the fascinating physical and metaphysical implications of its various conceptions in architecture
Finishing is essential to all human practices and concepts of time yet simultaneously it is largely impossible to identify an
entirely finished state of being As mortals we organize our worlds into beginnings and endings starts and finishes
Architecture s temporality however may contain something of both the mortal and immortal within it a desire for permanence
combined with lamentation over its impossibility While many approaches to finishing construct two opposed ontological
conditions the finished and the unfinished this dualistic ploy neglects the complexity of architectural practice cultural
reception and historiographic shifts in semiotics during the lifetime of a building More nuanced approaches are examined in
this collection of 38 essays and creative works from a diverse group of scholars architects and artists who conceptualize
finishing not simply as a final outcome but as an extended action a mood that presumes an end is near all the while working
continuously toward but never achieving completion It is here that the concept of finishing is not a state of being but a state
of becoming as an active thickening of time when the end is thought to be imminent but not yet attained Finishing more than
a final endpoint is a void state that is extended through efforts framing its territory while never quite containing it From the
material to the procedural and the conceptual this volume explores the practices of finishing in architecture within three
currents surfaces projects and most broadly architectural times It will be of interest to students and instructors of
