jQuery For Beginners Joseph Joyner, 2016-07-01. Web pages and all the tools they come with together will all the mind-blowing features like virtual programs which work on line are pure products of genius in programming and software engineering. Writing of web pages is done in languages such as HTML and JAVA. Java programs are basically the JavaScript we interact with every day of our lives as we search the internet; if not then we are interacting with the HTML scripts. These are the two most common programming languages for web development. There are web development tools which allow web pages and web sites to be written in either Java or HTML.
