

KCSE Agriculture Project Report – 2025

Title: Propagation of Apples and Guavas through Grafting and Budding Techniques

Student Name: Glen Kahura

Index Number: [Your index number]

School: [Your school]

Subject: Agriculture (443/3)

Project Period: Term 1 – Term 2, 2025

Supervisor: [Agriculture Teacher's Name]

1. Introduction

In Kenya, fruit farming is important for food and income. Growing fruit trees from seeds takes time and does not always produce quality fruits. In this project, I used grafting to grow apples and budding to grow guavas. These methods help make better plants with good fruits. They also grow faster and can resist diseases.

2. Objectives

1. To learn how to use grafting and budding.
2. To compare how well both methods work.
3. To check the cost of materials used.
4. To share ideas that farmers can use to grow fruits.

3. Literature Review

Research shows that grafting apples gives success of about 80-90% when done well. Budding guavas using the T-method also works well in warm areas. A KCSE project in Murang'a in 2021 had good results using the same methods. FAO recommends doing budding when the plants are growing actively, between March and May.
