Glocalized Solutions for Sustainability in Manufacturing Jürgen Hesselbach, Christoph Herrmann, 2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management The theme Glocalized Solutions for Sustainability in Manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions Products and services need to be addressed that ensure a high standard of living everywhere Resources required for manufacturing and use of such products are limited and not evenly distributed in the world Locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas

Power Electronic Systems Anish Deb, Suchismita Ghosh, 2017-12-19 A Totally Different Outlook on Power Electronic System Analysis Power Electronic Systems Walsh Analysis with MATLAB builds a case for Walsh analysis as a powerful tool in the study of power electronic systems It considers the application of Walsh functions in analyzing power electronic systems and the advantages offered by Walsh domain analysis of power electronic systems Solves Power Electronic Systems in an Unconventional Way This book successfully integrates power electronics as well as systems and control Incorporating a complete orthonormal function set very much unlike the sine cosine functions it introduces a blending between piecewise constant orthogonal functions and power electronic systems It explores the background and evolution of power electronics

and discusses Walsh and related orthogonal basis functions It develops the mathematical foundation of Walsh analysis and first and second order system analyses by Walsh technique It also describes the Walsh domain operational method and how it is applied to linear system analysis Introduces Theories Step by Step While presenting the underlying principles of Walsh analysis the authors incorporate many illustrative examples and include a basic introduction to linear algebra and MATLAB programs They also examine different orthogonal piecewise constant basis functions like Haar Walsh slant block pulse functions and other related orthogonal functions along with their time scale evolution Analyzes pulse fed single input single output SISO first and second order systems Considers stepwise and continuously pulse width modulated chopper systems Describes a detailed analysis of controlled rectifier circuits Addresses inverter circuits Power Electronic Systems Walsh Analysis with MATLAB is written for postgraduate students researchers and academicians in the area of power electronics as well as systems and control
