The Tyranny of Metrics Jerry Z. Muller, 2019-04-30 Today organizations of all kinds are ruled by the belief that the path to success is

quantifying human performance publicizing the results and dividing up the rewards based on the numbers But in our zeal to instill the evaluation process with scientific rigor we've gone from measuring performance to fixating on measuring itself The result is a tyranny of metrics that threatens the quality of our lives and most important institutions In this timely and powerful book Jerry Muller uncovers the damage our obsession with metrics is causing and shows how we can begin to fix the problem Filled with examples from education medicine business and finance government the police and military and philanthropy and foreign aid this brief and accessible book explains why the seemingly irresistible pressure to quantify performance distorts and distracts whether by encouraging gaming the stats or teaching to the test That's because what can and does get measured is not always worth measuring may not be what we really want to know and may draw effort away from the things we care about Along the way we learn why paying for measured performance doesn't work why surgical scorecards may increase deaths and much more But metrics can be good when used as a complement to rather than a replacement for judgment based on personal experience and Muller also gives examples of when metrics have been beneficial Complete with a checklist of when and how to use metrics **The Tyranny of Metrics** is an essential corrective to a rarely questioned trend that increasingly affects us all **Preserving the Promise** Scott Dessain, Scott E.

Fishman, 2016-10-05 **Preserving the Promise** Improving the Culture of Biotech Investment critically examines why most biotech startups fail as they emerge from universities into an ecosystem that inhibits rather than encourages innovation This Valley of Death squanders our public investments in medical research and with them the promise of longer and healthier lives The authors explicate the Translation Gap faced by early stage biotech companies the result of problematic technology transfer and investment practices and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies In **Preserving the Promise** Dessain and Fishman build on their collective experience as company founders healthcare investor Fishman and physician scientist Dessain The book offers a forward looking critical analysis of conventional wisdom that encumbers commercialization practices It exposes the self-defeating habits of drug development in the Valley of Death that waste money and extinguish innovative technologies through distorted financial incentives Explains why translation of biotech discovery into medicine succeeds so infrequently that it's been dubbed the Valley of Death Uncovers specific decision making strategies that more effectively align incentives improving clinical and financial outcomes for investors inventor entrepreneurs and patients Examines the critical early stages of commercialization where technology transfer offices and Angels act as gatekeepers to development and where tension between short term financial and long term clinical aspirations sinks important technologies Deconstructs the forces driving biotech recasts them in a proven conceptual framework and offers practical guidance for making the system better [Modern Principles: Macroeconomics 4e & Saplingplus for Modern Principles of Macroeconomics 4e \(Six Months Access\) \[With Access Code\]](#) Tyler Cowen, Alex Tabarrok, 2017-12-15 [Modern Principles of Economics \(Loose Leaf\)](#) Tyler Cowen, 2011-12-05 In a world full of economics
