Melling, 2010 Consumption of natural gas is growing rapidly and now accounts for nearly one quarter of the world's energy supply While natural gas is relatively clean compared to crude oil and coal its ability to assume a greater role in meeting the world's growing energy demands will depend largely on price In this report the author analyzes the two competing price mechanisms for natural gas the dominant practice of linking gas prices to oil prices and a second model based on competitive market prices Although Europe which uses both mechanisms is now the battleground in the natural gas pricing war its effects will likely be felt worldwide

**Foundations of Natural Gas Price Formation** Sergei Komlev, 2020-09-25 Foundations of Natural Gas Price Formation examines the fundamentals of natural gas price formation and the five principal features that make it unique in the world of commodities It presents a model of hybrid gas pricing developed by Sergei Komlev from his detailed analysis of the interlinked impact of these features that is presented as a corrective to potential market failure Using mainstream economic theory the book presents hybrid pricing mechanisms not previously analyzed Through a failure to understand the role of hybrid pricing boosters of spot pricing mechanisms through gas hubs are promoting an incorrect understanding of gas markets that will lead to market failure and to potential critical supply shortages in the near term future Foundations of Natural Gas Price Formation defends the system of oil indexed pricing as an accurate market based mechanism that has stood the test of time Natural Gas Magazine, 1930 Fossil Energy Update, 1978 The Economics of Natural Gas Pipeline Pricing Curtis Albert Cramer, 1966
