Collaborative Governance And Information Technology:

Routledge Handbook on Information Technology in Government Yu-Che Chen, Michael J. Ahn, 2017-02-17 The explosive growth in information technology has ushered in unparalleled new opportunities for advancing public service. Featuring 24 chapters from foremost experts in the field of digital government, this Handbook provides an authoritative survey of key emerging technologies, their current state of development and use in government, and insightful discussions on how they are reshaping and influencing the future of public administration. This Handbook explores key emerging technologies, i.e. big data, social media, Internet of Things (IOT), GIS, smart phones, mobile technologies, and their impacts on public administration. The impacts of the new technologies on the relationships between citizens and their governments, with the focus on collaborative governance. Key theories of IT innovations in government on the interplay between technological innovations and public administration. The relationship between technology and democratic accountability and the various ways of harnessing the new technologies to advance public value. Key strategies and conditions for fostering success in leveraging technological innovations for public service. This Handbook will prove to be an invaluable guide and resource for students, scholars, and practitioners interested in this growing field of technological innovations in government.

Wiki Government Beth Simone Noveck, 2009-08-01 Collaborative democracy: government with the people is a new vision of governance in the digital age. Wiki Government explains how to translate the vision into reality. Beth Simone Noveck draws on her experience in creating Peer to Patent, the federal government's first social networking initiative to show how technology can connect the expertise of the many to the power of the few. In the process, she reveals what it takes to innovate in government. Launched in 2007, Peer to Patent connects patent examiners to volunteer scientists and technologists via the web. These dedicated but overtaxed officials decide which of the million-plus patent applications currently in the pipeline to approve. Their decisions help determine which start-up pioneers a new industry and which disappears without a trace. Patent examiners have traditionally worked in secret, cut off from essential information and racing against the clock to rule on lengthy technical claims. Peer to Patent broke this mold by creating online networks of self-selecting citizen experts and channeling their knowledge and enthusiasm into forms that patent examiners can easily use. Peer to Patent shows how policymakers can improve decisionmaking by harnessing networks to public institutions. By encouraging coordinating and structuring citizen participation, technology can make government both more open and more effective at solving today's complex social and economic problems. Wiki Government describes how this model can be applied.
