Strategy, Structure and Corporate Governance Nabyala Daidj, 2016-07-01 Since the beginning of the 2000s, important changes in external environments have affected the corporate governance practices of firms all around the world. The corporate governance structure in each country develops in response to country specific factors and conditions. Firms are currently engaged in a variety of dynamic business relationships such as business networks, strategic alliances and conglomerates, especially in high technology sectors. *Strategy, Structure and Corporate Governance* by Nabyala Daidj proposes to analyze the main trends and drivers of change in corporate governance of several kinds of organizations: Large conglomerates. The development of large and complex conglomerate organizations have played an important role in the economy in Japan but also in other countries such as Korea with chaebols which can be defined as closely intertwined industrial groupings, inter-firms networks, districts, clusters etc. and recent forms of inter-firms networks, business ecosystems. The author examines several case studies and shows how shifts in markets and global competition are reconfiguring transactions within these organizations and are impacting corporate governance systems. [Integrated Water Resources Management in the 21st Century: Revisiting the paradigm](#) Pedro Martinez-Santos, Maite M. Aldaya, M. Ramón Llamas, 2014-03-03 Integrated water resources management advocates a coordinated approach for managing water resources in a way that balances social and economic needs with concern for the environment. While potentially useful, integrated water management is also controversial. Supporters believe that the multi-dimensional nature of water can only be understood and managed from a holistic perspective while critics often argue that integrated water management lacks sufficiently well defined rules for its practical implementation. This book, written by academics, users and practitioners, provides a down-to-earth approach to the ideal of integrated water resources management, drawing from conceptual frameworks and real-life practice to identify the key aspects that are yet to be resolved. As such, it examines the role of water accounting, food trade, environmental externalities and intangible values as key aspects whose consideration may help the water management.
