Automation Guide USA 69 2846 Business Automation Guide For Startups

Alex Harper

Automation Guide USA 69 2846 Business Automation Guide For Startups:

American Book Publishing Record, 1998 *The Executive's How-To Guide to Automation* George E. Danner, 2018-12-17

From driverless cars to pilotless planes many functions that have previously required human labor can now be performed using artificial intelligence For businesses this use of AI results in reduced labor costs and even more important creating a competitive advantage How does one look at any organization and begin the work of automating it in sensible ways This book provides the blueprint for automating critical business functions of all kinds It outlines the skills and technologies that must be brought to bear on replicating human like thinking and judgment in the form of algorithms Many believe that algorithm design is the exclusive purview of computer scientists and experienced programmers This book aims to dispel that notion An algorithm is merely a set of rules and anyone with the ability to envision how different components of a business can interact with other components already has the ability to work in algorithms Though many fear that the use of automation in business means human labor will no longer be needed the author argues that organizations will re purpose humans into different roles under the banner of automation not simply get rid of them He also identifies parts of business that are best targeted for automation This book will arm business people with the tools needed to automate companies making them perform better move faster operate cheaper and provide great lasting value to investors

Robotic Process Automation with Blue Prism Quick Start Guide Lim Mei Ying, 2018-11-30 Learn how to design and develop robotic process automation solutions with Blue Prism to perform important tasks that enable value creation in your work Key Features Develop robots with Blue Prism Automate your work processes with Blue Prism Learn basic skills required to train a robot for process automation Book Description Robotic process automation is a form of business process automation where user configured robots can emulate the actions of users Blue Prism is a pioneer of robotic process automation software and this book gives you a solid foundation to programming robots with Blue Prism If you've been tasked with automating work processes but don't know where to start this is the book for you You begin with the business case for robotic process automation and then move to implementation techniques with the leading software for enterprise automation Blue Prism You will become familiar with the Blue Prism Studio by creating your first process You will build upon this by adding pages data items blocks collections and loops You will build more complex processes by learning about actions decisions choices and calculations You will move on to teach your robot to interact with applications such as Internet Explorer This can be used for spying elements that identify what your robot needs to interact with on the screen You will build the logic behind a business objects by using read write and wait stages You will then enable your robot to read and write to Excel and CSV files This will finally lead you to train your robot to read and send emails in Outlook You will learn about the Control Room where you will practice adding items to a queue processing the items and updating the work status Towards the end of this book you will also teach your robot to handle errors and deal with exceptions The book concludes with tips and coding best practices for Blue Prism What you will
