Bases and Applications of Semantics      *Business Process Management* Andreas Gadatsch,2023-05-27 This textbook bridges the gap between business management and organisational methods and their digital implementation because process management increasingly means designing operational tasks In addition to methodological basics the work offers many practical examples and exercises Prof Gadatsch s book is now considered the current classic THE authoritative standard work on IT supported design of business processes The tenth edition has been revised and adapted to the requirements of the digital transformation Process management has evolved greatly due to the trend of digitalisation and as a result of the pandemic Another related trend is the increased use of Data Science methods for process management which has been consequently named Process Science at scientific conferences Recent research results published under the heading of Explorative Process Management are also of particular importance They show that the first main phase of process management was rather focused on optimising existing processes and business models New practical examples were included at various points in the book for example the migration strategies for the ERP system SAP S 4 HANA which is the basis for many industrial and service processes The chapter on modelling processes was updated and newer methods such as Business Model Canvas were included      **Artifact-Driven Business Process Monitoring** Giovanni Meroni,2019-10-23

This book proposes a novel technique named artifact driven process monitoring by which multi party processes involving non automated activities can be continuously and autonomously monitored This technique exploits the Internet of Things IoT paradigm to make the physical objects participating in a process smart Being equipped with sensors a computing device and a communication interface such smart objects can then become self aware of their own conditions and of the process they participate in and exchange this information with the other smart objects and the involved organizations To allow organizations to reuse preexisting process models a method to instruct smart objects given Business Process Model and Notation BPMN collaboration diagrams is also presented The work constitutes a revised version of the PhD dissertation written by the author at the PhD School of Information Engineering of Politecnico di Milano Italy In 2019 the PhD dissertation won the CAiSE PhD award granted to outstanding PhD theses in the field of Information Systems Engineering
