**Business Process Re-engineering** B. C. Glasson, 1994 The focus of this publication is BPR Business Process Re engineering and the challenges and opportunities it brings to the field of information systems The key to successful BPR from an information systems perspective is perceived to lie in integration Papers included in the book accordingly consider the following three areas both individually and in combination Business Process Re engineering Information Systems Opportunities or Challenges Information Systems Integration Business Process Re engineering is the restructuring of organizational processes through the innovative use of information systems and technology IS T The aim is to refit or revamp an organization to survive today's economic downturn

and to emerge refreshed and re vitalized to meet its social obligations and accept its economic challenges into the next century Information systems opportunities and challenges facing business process re engineers revolve around integration It is believed that unidimensional specialized segmented and piecemeal approaches have been adopted in IS T which do not work If IS T is to achieve its full potential for social and economic good there is little need for holistic multi dimensional comprehensive approaches IS T researchers and practitioners should look to integrate their efforts with those of others in at least three ways Integrating theory and practice will encourage relevant research and more rapid technology transfer Integrating technical and social aspects will help alleviate those implementation issues that have bedevilled IS T for decades Integrating applications and subject matter will result in synergistic multi disciplinary approaches and solutions combining the interests of the many specialists involved in the field The broad ranging examination of these factors offered by the book highlights the overall need for information systems and technology integration if active responses to the opportunities and challenges presented by Business Process Re engineering are to be achieved *Formulation, Implementation, and Control of Competitive Strategy* John A. Pearce, Richard Braden Robinson, 2009 This text looks at contemporary research in strategic management with an emphasis on conceptual tools and skills created by scholars and practitioners in the field
