pollution at sea Numerous spills in the past have been of heavy fuel oil from non tankers However the international liability
and compensation regime covered only oil pollution damage caused by oil tankers There was thus a need to bring the law on
marine oil pollution responsive to oil pollution damage caused by non tankers In March 2001 the International Convention on
Civil Liability for Bunker Oil Pollution Damage was adopted following a diplomatic conference at the International Maritime
Organization Though this convention has not yet come into force its various aspects should already be considered as they will
surely affect the maritime industry as a whole and the non tanker sector in particular This book provides a timely and
comprehensive study on the concept of compulsory insurance its main purpose of ensuring compensation and its
interrelations with other features such as the rule of strict liability and the limitation of liability under the convention
