own leadership journey together with his passion for combining business acumen and positive social impact Chris's authenticity, commitment to making a difference, his successes and failures, and his drive for continued growth and leadership development come out in the real world stories he uses to convey the characteristics of each of the seven dimensions throughout the book. Chris's colleague Liz Mallas writes a chapter demonstrating how the framework came to life and was tested in a company setting. There is value in the Complete Business Leader framework whether you are a twenty-three-year-old starting a career, a mid-career mid-level leader, an entrepreneur, or a senior executive in a large business. And the framework has value regardless of whether your organization is a large or small business, a nonprofit, or even a church.

Leadership Transitions Richard Elsner, Bridget Farrands, 2012-09-03 In a working life of 35 years, a manager can expect to make at least 10 job changes or transitions where the demands for rapid business delivery and effective leadership will only increase with each new job. According to recent research, over 25 per cent of new leaders appointed from within fail within 18 months; the figure is closer to 40 per cent for new leaders appointed externally. The cost of this rate of failure is high, ranging from financial to performance to organizational disruption. This book identifies the sources of these failures and how to overcome them. The authors show that whether the new leader has arrived as an external appointment or has been promoted internally, the experiences can be divided into three phases: Arriving, Surviving, and Thriving. By analysing the different features of the leader's experience at each of these stages, the authors are able to provide a strategy for leaders to take charge and succeed in their new roles.

Business Leadership in Turbulent Times Michael Lawrie, George Tsetsekos, 2021-09-22 Business Leadership in Turbulent Times presents an integrative methodology for decision making that advances the notion that business success involves more than strategy. Strategy is an important facet but not the only determinant for success. Devising the strategy in the first place, deploying assets following a financial model that supports the strategy, picking the right leaders, and company culture all play critical roles. In this book, the authors share an approach for businesses to thrive during good and bad times. Reflecting on their diverse experiences in business and academia, they answer questions such as: Why do some firms become winners while others lose? How do successful firms create and sustain value? Why do firms that were once great suddenly fail? Most importantly, the authors provide a framework for senior executives to make decisions even during times of crisis. The book includes an appendix of insights and predictions about the impact of COVID-19 on business leadership. The crisis has implications on short and long-term priorities, the pace of innovation, and the role of leaders.
