

Lyle Campbell: Historical Linguistics: An Introduction

(Edinburgh: Edinburgh University Press, 2020, 498 p.)

The book in question is a voluminous work consisting of many aspects of diachronic linguistics. These numerous but fundamental aspects vary from a detailed typology of historical change in linguistic components (lexeme, phoneme, meaning, syntax, morphology) to technical tools that are used in comparative and quantitative methods regarding many sub-disciplines such as linguistic reconstruction, loanword adaptation, language classification, and language contact. Outlying topics such as linguistic prehistory and philology are also accommodated. Although these topics are multifarious, it is important to note that the author preemptively distinguishes what is not considered in the coverage area of historical linguistics and excludes those aspects in plain view. History of linguistics, the origin of human language (glottogenesis), and the attitude and precautions towards change are the notorious primary misconceptions of historical linguistics. The author does not solely elucidate the topics but approaches the issues more pragmatically by demonstrating how things work in this area. Therefore, the baseline of the methodologies used in historical linguistics is presented in the book in a simple manner.

According to the author, sound change, which is being the most prominently emphasized area of historical linguistics, is dwelt on thoroughly. The regularity of the changes is underlined. Several classifications are brought out, such as the conditioned/unconditioned and phonemic/non-phonemic nature of the changes. The terms *assimilation* and *dissimilation* appear as the grounds for the changes in this section. Campbell presents the main kinds of common sound changes as deletions, insertions, and several other cases that can be grouped under the topic of substitution. Associates of the latter are given in the book as compensatory lengthening, rhotacism, metathesis, haplology, breaking, and several other vowel and consonant adaptations.

In the sequel, the borrowing process of loanwords and the practice of identifying them are discussed. As explained, the loans may act as indicators of the past features of languages as they sometimes contain distinctive features of the past that have been resistant to adaptation in the recipient languages. Following that part, another form of change, analogy, is discussed. It is quoted that the analogy is irregular when compared with sound change. It is further classified in the book as immediate and non-immediate. Examples include hypercorrection, folk etymology, metanalysis, and back-formation. The author states that sound change, borrowing, and analogy are considered the most important types of linguistic changes. Apart from these, Campbell addresses lexical, semantic, syntactic, and morphological changes.

The book aims to expressly demonstrate how to be a historical linguist by guiding through all the necessary steps to reconstruct proto-languages. After
