*Harrison Decoded* Rory McEvoy, Jonathan Betts, 2020-04-27 *Harrison Decoded Towards a Perfect Pendulum Clock* brings together the output of a forty year collaborative research project that unpicked and put into practice the fine details of John Harrison's extraordinary pendulum clock system. Harrison predicted that his unique method of making pendulum clocks could provide as much as one hundred times the stability of those made by his contemporaries. However his final publication which promised to describe the system was a chaotic jumble of information much of which had nothing to do with clockwork. One contemporary reviewer of Harrison's book could only suggest that the end result was a product of Harrison's superannuated dotage. The focus of this book centres on the making, adjusting and testing of Clock B which was the subject of various trials at the Royal Observatory Greenwich. The modern history of Clock B is accompanied by scientific analysis of the clock system, Clock B's performance, the methods of data gathering alongside historical perspectives on Harrison's clockmaking, that of his contemporaries and some evaluation of the possible influence of early 18th century scientific thought.

This poetic and evocative work tells the story of how humankind has striven to capture time through the ages. From the earliest sundials to today's atomic clocks we have slowly refined our ability to measure this powerful and elusive force yet none of our clever instruments has ever been able to answer the age old question: What is time?     An account of the influence which two Pendulum Clocks were observed to have upon each other, etc John ELLICOTT, 1760
