precision agriculture However these technologies are still in their infant stage and there are many challenges and questions related to them that still need to be addressed The goal of this Research Topic is to provide a platform to share the latest research results on the application of MV and ML for PP and PA It aims to highlight cutting edge technologies bottle necks and future research directions for MV and ML in crop breeding crop cultivation disease management weed control and pest control

Indian Science Abstracts ,1992 **Computer Architecture: A Minimalist Perspective** William F. Gilreath, Phillip A. Laplante, 2003-03-31 This book examines computer architecture computability theory and the history of computers from the perspective of minimalist computing a framework in which the instruction set consists of a single instruction This approach is different than that taken in any other computer architecture text and it is a bold step The audience for this book is researchers computer hardware engineers software engineers and systems engineers who are looking for a fresh unique perspective on computer architecture Upper division undergraduate students and early graduate students studying computer architecture computer organization or embedded systems will also find this book useful A typical course title might be Special Topics in Computer Architecture The organization of the book is as follows First the reasons for studying such an esoteric subject are given Then the history and evolution of instruction sets is studied with an emphasis on how modern computing has features of one instruction computing Also previous computer systems are reviewed to show how their features relate to one instruction computers Next the primary forms of one instruction set computing are examined The theories of computation and of Turing machines are also reviewed to examine the theoretical nature of one instruction computers Other processor architectures and instruction sets are then mapped into single instructions to illustrate the features of both types of one instruction computers In doing so the features of the processor being mapped are highlighted
