Statistical Research Methods in the Life Sciences Pejaver Vishwamber Rao, 1998 Appropriate for all courses in statistical methods for the agricultural life health and environmental sciences this book offers a practical and modern approach that minimizes computation and emphasizes conceptual understanding Rao continually emphasizes issues and topics most relevant to modern day research in the life sciences For example point and interval estimation take priority over

testing of statistical hypothesis and methods and guidelines for determination of sample size are indicated whenever possible. Statistical Research Methods in the Life Sciences also presents a self contained and complete discussion of each experimental situation considered. In the two sample setting for example in addition to presenting the procedures under the usual analysis of variance assumption Rao also presents methods for checking the validity of the assumptions.

Learning Statistics with Real Data Bruce E. Trumbo, 2002. Designed to teach students to apply statistical methods to real problems a universal need. Bruce Trumbo's concise new book teaches basic statistical principles through their application to real data. The data sets are chosen from fields to which all students can relate such as marketing, industrial safety, anthropology, psychology, banking, biology, linguistics, public health, geography, physics, sports, geology, and medicine. Throughout the book the emphasis is on how statistical ideas and methods can be used to illuminate the data rather than on how the data can be used to illustrate particular statistical methods. Some of the basic statistical methods that prove to be useful include graphical displays, confidence intervals, one and two sample t tests, chi squared analyses of contingency tables, simple and multiple linear regression, correlation, one way ANOVAs and block designs. For each data set students are guided through some basic procedures usually using MINITAB™ then invited to explore the data more extensively on their own with answers and possible approaches.
