Therefore this study attempts to develop an easy to apply framework to assess ES from bamboo and test them in three countries in Asia and Africa Nepal Indonesia and Ethiopia in order to understand the relative supply capacity of the key ES from bamboo forests The literature related to ES and assessment frameworks was reviewed so as to design an appropriate assessment framework for bamboo forests This study offers an easy to apply framework that can be used widely The research shows that the ES supply capacity of bamboo forests is higher than for industrial planted forest while it is lower than for the natural forests in all case study sites The ES assessment from bamboo forests poses several challenges defining and classifying ES limited data and complex relationships in trade offs and synergies of ES that should be kept in mind while designing the framework *The Book of Duarte Barbosa* Duarte Barbosa,1921
