

Bubble and Foam Chemistry

Robert J. Pugh

Robert J. Pugh

Bubble and Foam Chemistry

This collaboration guide will equip the reader with a thorough understanding of the complete field of foaming chemistry. Requiring only basic theoretical background knowledge, the book provides:

- A straightforward introduction to the principles and properties of foams and foaming surfactants, underpinning the key ideas about why foaming occurs, how it can be assessed and how different degrees of performance can be achieved.
- The latest test methods, including laboratory and industrial developed techniques.
- Details on a variety of different kinds of foams, from wet detergents, food foams, to pigments, medical and rigid foams, which connect theory to real world applications and recent developments in foam research.

Combining academic and industrial viewpoints, the book is the definitive stand alone resource for researchers, students, and industrialists working on foam technology, colloidal systems in the fields of chemical engineering, fuel mechanics, physical chemistry, and applied physics.

Robert J. Pugh is a Visiting Professor at Nottingham Trent University. He is an active member of the foams community and has almost 20 years' experience in industry, having worked as a foam specialist for Dow Chemicals and Unilever Research. He has also acted as a consultant for Argus Flow, Huls, Hulsel, Hulsel, GlaxoSmithKline, Procter and Gamble, and Aronco Chemicals. He has edited two previous books in the field of surface and colloid science and has authored several highly cited review papers on the topic of foams and foaming.
