Progress and Shortfalls in Europe's Defence The International Institute for Strategic Studies (IISS), 2025-09-03 European NATO members face the dual challenge of Russia s military threat and the United States expectations about significantly greater burden sharing or even burden shifting for Europe s defence Their commitment at The Hague Summit in June 2025 to invest 5% of GDP in defence expenditure annually by 2035 acknowledged the need to develop a more sovereign European defence capability and reduce critical dependencies This IISS Strategic Dossier assesses the progress that has been made in building up NATO European defence capability It analyses the critical hardware gaps of most European NATO allies relating to intelligence surveillance and reconnaissance assets long range strike systems and integrated air and missile defence The dossier examines European gaps in the software essential for modern military operations Although the significant dependence on US providers of hyperscale cloud computing capacity is unlikely to change soon efforts by European armed forces to address their software gaps have led to European companies developing significant expertise in edge cloud computing for advanced defence projects The volume discusses how European countries are looking to speed up procurement including through legislative changes Importantly the trend towards prioritising equipment purchases from

domestic or European suppliers continues The dossier also assesses the prospects for European allies achieving NATO's new investment pledge This IISS Strategic Dossier was produced in the context of the IISS Prague Defence Summit PDS 2025 which has been supported by the government of the Czech Republic *Signal*, 1990 **Anti-submarine Warfare** Sangram Singh Byce, Rajni Kant Tewari, 2006 **IEEE Membership Directory** Institute of Electrical and Electronics Engineers, 1999 **500 Years After Leonardo Da Vinci Machines: Towards Innovation And Control** Maide Bucolo, Arturo Buscarino, Carlo Famoso, Luigi Fortuna, Salvina Gagliano, 2020-01-30 The book focuses on the role of the Leonardo da Vinci projects and inventions specifically the interdisciplinarity of his studies that represents perhaps the first example of the paradigm of complex systems engineering The projects are characterized within a modern conception of his thinking looking at the main motivations behind his machines The book also proposes a set of experimental realizations of the models made mainly in wood using the actual concept of automatic control and microcontroller technology emphasizing that the Leonardo machines can be seen in agreement with modern current technology The remote control of each machine is considered and the behavior of each monitored Machines are revisited based on the transmission principle that adopts microcontrollers and bluetooth devices studying the equipment behind the actuation of the systems Thus the paradigm of each machine is maintained unaltered while the latest technologies show the relevance of such inventions in the modern era The study also stimulated more applications and future projects that can start from the original Leonardo projects and then proceed to the next centuries providing readers simple and efficient ideas to innovate his projects using modern low cost microcontrollers **Leonardo's Lost Robots** Mark Rosheim, 2006-06-15 Leonardo's Lost Robots reinterprets Leonardo da Vinci's mechanical design work revealing a new level of sophistication not recognized by art historians or engineers By identifying his major technological projects the book reinterprets Leonardo's legacy of notes showing that apparently unconnected fragments from dispersed manuscripts actually comprise cohesive designs for functioning automata Using the rough sketches scattered throughout almost all of Leonardo's notebooks the author has reconstructed Leonardo's programmable cart which was the platform for other automata a Robot Lion a Robot Knight and a hydraulically powered automaton for striking a bell Through a readable lively narrative Mark Rosheim explains how he reconstructed da Vinci's designs In a foreword the world renowned Leonardo scholar Carlo Pedretti interprets the significance of these reconstructions for our understanding of Leonardo's oeuvre **Art, Science and Technology**, 1974 *Leonardo - The machines*, *Leonardo* Lorna Lewis, 1937 Leonardo Domenico Laurenza, 2004 Gli studi di Leonardo sul volo attraverso una trattazione sistematica e una descrizione del loro progredire nel corso del tempo Il volume ricostruisce l'origine dell'idea leonardesca di realizzare il sogno del volo umano a partire dagli anni trascorsi a Firenze nella seconda met' del Quattrocento un sogno che ha dovuto aspettare pi' di quattro secoli per essere realizzato Descrive quindi gli sviluppi successivi della ricerca dagli spettacolari progetti di macchine volanti elaborati nel periodo in cui Leonardo si trova a Milano ospite di

Ludovico il Moro all attento studio del volo degli uccelli portato avanti specialmente dopo il 1500 Un indagine durata una vita intera nell utopia di una macchina in grado di imitare la natura **Leonardo's Lost Robots** Mark Rosheim,2009-09-02 This book reinterprets Leonardo da Vinci's mechanical design work revealing a new level of sophistication not recognized by art historians or engineers The book reinterprets Leonardo's legacy of notes showing that apparently unconnected fragments from dispersed manuscripts actually comprise cohesive designs for functioning automata Using the rough sketches scattered throughout almost all of Leonardo's notebooks the author has reconstructed Leonardo's programmable cart which was the platform for other automata Through a readable lively narrative the author explains how he reconstructed da Vinci's designs
