fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing

Gibbs,1999 Silver Colloids in Bacteria: A Study by Transmission Electron Microscopy, Absorption Spectroscopy and Elemental Analysis ,2002 Reduction of silver ions in and on bacterial cells was shown to produce silver colloids giving rise to intense surface enhanced Raman spectra SERS of chemical components of the cell Transmission electron microscopy absorption spectroscopy and elemental analysis were used to explore the distribution of silver in and on the cells produced by two different protocols The first protocol gives rise to an internal colloid of nanometer sized silver particles uniformly distributed within the cells The second protocol produces a rough aggregated silver layer on the cells surface Both protocols largely preserve the shape of the cells although there is a size reduction which is to be detailed in a subsequent report Treatment with Potassium cyanide removes the silver and reverts the cells to a size and shape similar to the original
