conservation of cultural heritage has become increasingly difficult to obtain and this trend shows no sign of changing significantly in the foreseeable future The twelfth triennial meeting of the International Committee for the Conservation of Mosaics held in Sardinia in October 2014 focused on the theme of cost broadly considered relating specifically to the preservation and presentation of the world s mosaic heritage This handsome abundantly illustrated volume provides a comprehensive record of the conference The volume s sixty seven papers and posters comprising contributions from more than one hundred leading experts in the field reflect the conference s principal themes cost methods of survey and documentation conservation and management education and training backing materials and techniques presentation and display and case studies Papers are presented either in English French or Italian there are abstracts in English and either French or Italian for all entries The volume will be of interest to conservators site managers and others responsible for conserving the mosaic heritage especially in these challenging times **Arch Bridges** A. Sinopoli,2020-12-17 Modern structural engineering surprises us with the mastery and certainty with which it plans and carries out daring projects such as the most recent metal or concrete bridges whether they be suspension or arch bridges On the other hand little is yet known about the state of knowledge of construction science and techniques which well before the arrival of modern methods based on the mechanics of deformable continua made it possible in the past to erect the vaulted masonry structures rthat we have inherited The fact that these have lasted through many centuries to our time and are still in a fairly good state of conservation makes them competitive as far as stability and durability are concerned with those constructed in other materials Although it is known that the equilibrium of the arch is guaranteed by any funicular whatsoever of the loads contained inside the profile of an arch finding the unique solution is not such a certainty In other words the problem of the equilibrium of vaulted structures is Poleni s problem the one for which the Venetian scientist was able to give an exemplary solution on the occasion of the assessment of the dome of St Peter s Arch Bridges focuses on the main aspects of the debate about the masonry arch bridge History of structural mechanics and construction theoretical models analysis for assessment numerical methods experimental and non destructive testing maintenance and repair are the topics of the Conference The breadth and variety of the contributions presented and discussed by leading experts from many countries make this volume an authoritative source of up to date information **Architectural Conservation Studio** Calogero Bellanca,2020-01-01 The book provides a series of reflections on the study of architectural preexistences that have matured during the almost thirty five years of study and research in Italy and Europe Furthermore it shows how the discipline of restoration of monuments is all based in architecture intended in its many faceted meanings The methodical approach to the restoration of historic architecture consists in the historical critical analysis central nucleus of the study of architecture and is composed by specific in depth thematic sessions the historical iconography the analysis of the constructive features the constructive model the volumetric layout metrological and proportional analysis the theme of the figurative model the analysis of masonry the
