**Petroleum Production Engineering, a Computer-Assisted Approach** Boyun Guo Phd, William C. Lyons Ph. D. P. E., Ali Ghalambor Phd, 2007-03 Petroleum Production Engineering A Computer Assisted Approach provides handy guidelines to designing analyzing and optimizing petroleum production systems Broken into four parts this book covers the full scope of petroleum production engineering featuring stepwise calculations and computer based spreadsheet programs Part one contains discussions of petroleum production engineering fundamentals empirical models for production decline analysis and the performance of oil and natural gas wells Part two presents principles of designing and selecting the main components of petroleum production systems including well tubing separation and dehydration systems liquid pumps gas compressors and pipelines for oil and gas transportation Part three introduces artificial lift methods including sucker rod pumping systems gas lift technology electrical submersible pumps and other artificial lift systems Part four is comprised of production enhancement techniques including identifying well problems designing acidizing jobs guidelines to hydraulic fracturing and job evaluation techniques and production optimization techniques Provides complete coverage of the latest techniques used for designing and analyzing petroleum production systems Increases efficiency and addresses common problems by utilizing the computer based solutions discussed within the book Presents principles of designing and selecting the main components of petroleum production systems

**Petroleum Production Engineering** Boyun Guo, Xinghui Liu, Xuehao Tan, 2017-02-10 Petroleum Production Engineering Second Edition updates both the new and veteran engineer on how to employ day to day production fundamentals to solve real world challenges with modern technology Enhanced to include equations and references with today s more complex systems such as working with horizontal wells workovers and an entire new section of chapters dedicated to flow assurance this go to reference remains the most all inclusive source for answering all upstream and midstream production issues Completely updated with five sections covering the entire production spectrum including well productivity equipment and facilities well stimulation and workover artificial lift methods and flow assurance this updated edition continues to deliver the most practical applied production techniques answers and methods for today s production engineer and manager In addition updated Excel spreadsheets that cover the most critical production equations from the book are included for download Updated to cover today s critical production challenges such as flow assurance horizontal and multi lateral wells and workovers Guides users from theory to practical application with the help of over 50 online Excel spreadsheets that contain basic production equations such as gas lift potential multilateral gas well deliverability and production forecasting Delivers an all inclusive product with real world answers for training or quick look up solutions for the entire petroleum production spectrum

*Petroleum Production Systems* Michael J. Economides, 2013 Written by four leading experts this edition thoroughly introduces today s modern principles of petroleum production systems development and operation considering the combined behaviour of reservoirs surface equipment pipeline systems and

storage facilities The authors address key issues including artificial lift well diagnosis matrix stimulation hydraulic fracturing and sand control They show how to optimise systems for diverse production schedules using queuing theory as well as linear and dynamic programming Throughout they provide both best practices and rationales fully illuminating the exploitation of unconventional oil and gas reservoirs Updates include Extensive new coverage of hydraulic fracturing including high permeability fracturing New sand and water management techniques An all new chapter on Production Analysis New coverage of digital reservoirs and self learning techniques New skin correlations and HW flow techniques
