**Development Naivety and Emergent Insecurities in a Monopolised World** Mawere, Munyaradzi, 2018-09-17 It is common knowledge that development without security is like a runaway horse Yet development in Africa has been plagued by insecurities since the extractive periods of slave trade and colonialism In spite of political independence and the euphoria of sovereignty as states Africa has failed to address insecurity which continues to loom large and to threaten aspirations towards truly inclusive and sustainable development A consequence has been Africa s development naivety vis vis the monopolisation of development by the predatory elite actors of the global North and their local facilitators To salvage the continent from such predation and the insecurities engendered requires novel and innovative imagination and praxis This book draws from both the haunted landscapes and bitter memories of past exploitations and from the feeding of the insatiable North with African resources and humanity It brings together essays by a concerned generation of scholars driven by the urgent need for radical decolonisation of African development and its legacies of insecurities It is handy to students and practitioners in economics policy studies political science development studies global and African studies

**Grasslands of the World** Victor R. Squires, Jürgen Dengler, Limin Hua, Haiying Feng, 2018-09-05 This book begins with a brief account of the extraordinary sequence of events that led to emergence of grasslands as major vegetation formations that now occupy some of the driest and hottest and the highest and coldest on earth as well as vast steppes and prairies in more temperate climes It is the story of grasses successfully competing with forests and woodlands aided and abetted by grazing herbivores and by humans and their use of fire as a tool It is a story of adaptation to changing climates and the changing biophysical environments A major focus of the book is the Palaearctic biogeographic realm that extends over some 45 million km<sup>2</sup> and thus more than 1/3 of the terrestrial ice free surface on Earth It comprises extensive grasslands of different types and origin which can be subdivided into 1 natural grasslands with 1a steppes climatogenic in dry climates 1b arctic alpine grasslands climatogenic in cold climates and 1c azonal and extrazonal grasslands pedogenic and topogenic as well as 2 secondary grasslands created and sustained by human activities such as livestock grazing mowing or burning Grasslands of the Palaearctic do not only form a major basis for the agriculture of the region and thus its food supply but are also crucial for other ecosystem services and host a supra proportional part of the realm s plant and animal diversity To reflect that suitability of grasslands for biodiversity strongly depends on their state we apply the term High Nature Value grassland to those natural grasslands that are not degraded in good state and those secondary grasslands that are not intensified semi natural The situation in a variety of countries where grasslands are evolving under the influence of global climate change is also considered Case studies are presented on Southern Africa Eastern Africa India China South America North America and Australia The concluding chapter examines a set of themes arising from the chapters that make up the bulk of this book The following provide a focus recent history of grassland biomes brief recap of current thinking and recent

trends with special reference to dry grasslands in the Palearctic regions the current status of grasslands and germplasm resources biodiversity an overview management systems that ensure sustainability how to recover degraded grasslands socio economic issues and considerations in grassland management the impacts of environmental problems in grasslands such as future climate change and intensification and the problems prospects facing pastoralists and other grassland based livestock producers

**Philosophy of Race** Naomi Zack,2023-04-27 Philosophy of Race An Introduction provides plainly written access to a new subfield that has been in the background of philosophy since Plato and Aristotle The second edition is updated to include contemporary developments such as digital racisms metaphysical othering and metaphysical racism and the rise of populist movements Its focus has also been expanded to address non white racial groups in the Americas Europe and beyond such as the Roma and Uighur people Part I provides an overview of ideas of race and ethnicity in the philosophical canon egalitarian traditions race in biology and race in American and Continental Philosophy Part II addresses race as it operates in life through colonialism and development social constructions and institutions racism political philosophy gender and populist movements This book constructs an outline that will serve as a resource for students nonspecialists and general readers in thinking talking and writing about philosophy of race

**The Coming Revolution** Ben Reynolds,2018-06-29 A technological revolution is driving capitalism toward crisis and collapse Can our society evolve in time to rescue the future Radical advances in automation robotics and computer technology have thrown millions out of work and will only continue to do so in the years to come At the same time cheap individually accessible machines will wrestle for primacy with both gleaming highly automated factories and sweatshops alike ultimately eroding the dominance of industrial production Economic growth is slowing down and it is not going to speed up again The pressures fueling today s global unrest will not go away and are only going to get worse as wages stagnate in many countries solid employment becomes harder to find and cuts to social benefits continue Competing radical and reactionary ideologies will clash as political consensus crumbles and the world s peoples search for answers to these challenges In its opening decades the 21st will be a century of war and revolution By the end of the 21st century capitalism will be consigned to the history books Despite the seeming darkness of our era our future is filled with incredible possibility If working people join together we can create a world of freedom beauty and abundance where poverty and tyranny are merely distant memories for our grandchildren This is the story of The Coming Revolution

*The Golden Thread* Kassia St. Clair,2019-11-12 Book Authority 36 Best Textile Design eBooks of All Time A briskly told 30 000 year history of textiles that will make you rethink your relationship with fabric Elle Decoration From colorful threads found on the floor of an ancient Georgian cave to the Indian calicoes that fueled the Industrial Revolution The Golden Thread illuminates the myriad and fascinating histories behind the cloths that came to define human civilization the fabric for example that allowed mankind to shatter athletic records and the textile technology that granted us the power to survive in space Exploring the enduring association of textiles with women s work Kassia St

Clair spins a rich social history that also reflects the darker side of technology Rachel Newcomb Washington Post *Digital Consciousness: A Transformative Vision* Jim Elvidge,2018-12-14 What could be a more compelling read than a book that explains the greatest mysteries known to man in one fell swoop Who is God What happens after we die What the heck is quantum entanglement Why did Dolly s braces disappear in the movie Moonraker Our reality is not what it appears to be The latest physics experiments demonstrate that an objective reality doesn t exist And no one truly knows what consciousness is or where the mind resides Strange interconnectedness anomalous events and changing histories confound even the most open minded of scientists No single theory seems to be able to explain it all Until now
