Totally Integrated Enterprises Thomas E. Miller, Daryle W. Berger, 2001-06-22 At the foundation of today's leading edge manufacturing companies is a common vision for virtual distributed enterprise in an agile environment where organizations can swiftly and cost effectively bring products from concept to production and respond dynamically to changes in customer and market requirements Totally Integrated Enterprises A Framework and Methodology for Business and Technology Improvement provides a framework and a methodology for understanding and mapping current enterprise configurations as well as for designing the revised architecture needed for the totally integrated enterprise It also helps you select the MRPII MES APS SCM or ERP software most appropriate for your needs and for achieving total enterprise integration MRPII MES APS SCM and ERP Without a strategic direction it is just alphabet soup How do you determine what is best for your organization Which software system is most appropriate to your needs Courses classes seminars and experts galore are available to help you learn and implement the fine details of every value add cost saving customer pleasing quality improving buzzword compliant business initiative you have ever heard of and many that you haven't What has been missing is a way to tie them together Until now Totally Integrated Enterprises A Framework and a Methodology for Business and Technology Improvement gives you a high level enterprise architecture that makes the implementation of best practices and technologies both existing and emergent manageable This book shows you how to Improve your product and process integration as well as develop and deliver new products within a virtual enterprise Incorporate business strategies and functions to drive product design and manufacturing requirements operations and post production activities Integrate designers manufacturers and suppliers to operate as a virtual enterprise Create staff and empower integrated product teams resulting in higher quality products Communicate enterprise information to and from every stakeholder in the virtual enterprise in real or near real

time Manage production among facilities and exchange production data and status information as a routine basis of business Acquisitions and mergers have left many enterprises with a legacy of varied cultures resources and processes that must be reshaped into a single integrated whole Increasing pressures from global competition force enterprises to become cost effective high quality providers to traditional customers and push them to develop new markets and product lines Nearly every enterprise needs to make the transition to a globally interdependent business paradigm Totally Integrated Enterprises A Framework and Methodology for Business and Technology Improvement gives you the key definitions that allow you to understand and communicate with vendors consultants and experts in the field Using the techniques in this book you will see the results so often promised but not realized from technology Knowledge Sharing in the Integrated Enterprise Peter Bernus,Mark Fox,2005-09-20 Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice It is widely recognized that the practice of engineering enterprises needs a number of models but how to maintain the relation between these models with ease is still a problem Model interoperability is an issue on multiple counts How to interchange models between enterprise modeling tools How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity How to maintain a coherent and evolving set of enterprise models in support of continuous change processes How to use and reuse enterprise models as a knowledge resource The answers to these questions are of great importance to anyone who is implementing ISO9001 2000 requirements whether through using enterprise architecture practice or not although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort This volume attacks the problem on three fronts 1 Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration 2 Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies 3 Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for Manufacturing DIISM 04 Workshop While DIISM is traditionally oriented at supporting manufacturing practice the results have a far greater domain of applicability Digital Manufacturing & Automation III Yong Hong Tan,2012-07-26 Selected peer reviewed papers from the 3rd International Conference on Digital Manufacturing Automation ICDMA 2012 August 1 2 2012 Guangxi China *American Book Publishing Record* ,2007
