Hosmer, Jr., Stanley Lemeshow, 1989-07-31 Shows how to model a binary outcome variable from a linear regression analysis point of view Develops the logistic regression model and describes its use in methods for modeling the relationship between a dichotomous outcome variable and a set of covariates Following establishment of the model there is discussion of its interpretation Several data sets are the source of the examples and the exercises and a number of software packages are used to analyze data sets including BMDP EGRET GLIM SAS and SYSTAT

Applied Logistic Regression D.W. Hosmer, S. Lemeshow, 1989 Applied logistic regression is the first introductory work devoted to this useful statistical technique Emphasis is on the use of logistic regression in methods for modeling the relationship between a dichotomous outcome variable and a set of covariates The model is developed by approaching logistic regression via a linear regression point of view rather by means of contingency tables Considerable importance is placed on effective modeling strategies and the
