satisfaction but many times beginners aren't sure where to start. There are lots of things to take into consideration when starting a project and if you have no Maker experience it can be quite confusing. For this reason we put together 10 Arduino projects for beginners that anyone can make. To get you started it's best if you have an Arduino starter kit that contains an Arduino, jumper wires, resistors, a breadboard, LED, and buttons. Some of the projects require additional parts and have links to where you can buy them. In all the projects you'll see we used [circuit.io](#) for the BoM, bill of materials, step-by-step wiring guide, and code samples, but of course you can change the original design, add or remove components, and make your own version of the project.
