Algebra with Applications blends computational and conceptual topics throughout Early treatment of conceptual topics in the
context of Euclidean space gives students more time and a familiar setting in which to absorb them This organization also
makes it possible to treat eigenvalues and eigenvectors earlier than in most texts Abstract vector spaces are introduced later
once students have developed a solid conceptual foundation Concepts and topics are frequently accompanied by applications
to provide context and motivation Because many students learn by example *Linear Algebra with Applications* provides a large
number of representative examples over and above those used to introduce topics The text also has over 2500 exercises
