David Frank Benson, Alfredo Ardila

Child Language And Developmental Dysphasia:

Child Language and Developmental Dysphasia Harald Clahsen,1991 The subject of this two part work is the acquisition of language structure in which the development of syntax and morphology is examined by investigations on children without language problems and on children with developmental dysphasia The author uses a comparative acquisition study to provide insights into the structure and development of the language acquisition device which cannot be obtained by isolated analysis of only one type of learning The theoretical framework used for the investigations is the learnability theory in which acquisition models are proposed which are heavily influenced by theoretical linguistics Part I shows how child grammar acquisition can be explained in the framework of learnability theory and Part II deals with deficiencies in normal grammar acquisition using the learnability theory

Aphasia David Frank Benson,Alfredo Ardila,1996 An up to date integrated analysis of the language disturbances associated with brain pathology this book examines the different types of aphasia combining two clinical approaches the neurological and the neuropsychological Although they stress the clinical aspects of aphasia syndromes they also review assessment techniques linguistic analyses problems of aphasia classification and frequently occurring related disorders such as alexia agraphia acalculia and anomia In addition they examine commonly encountered speech disorders neurobehavioral and psychiatric problems commonly associated with aphasia and the language characteristics of aging and dementia Rehabilitation and recovery are discussed and a neural basis for aphasia and related problems is proposed Neuropsychologists neurologists speech therapists psychiatrists and occupational therapists will find this book invaluable when dealing with language disorders resulting from brain disease or injury

Hispanic Child Languages John Grinstead,2009-10-22 This book contains 12 papers contributed by leading scholars in the field of language development studying variants of the languages which originated on the Iberian peninsula The contributors examine language development in both typically developing and language impaired populations who are learning language in diverse learning conditions including language contact as well as monolingual and bilingual Spanish Catalan Galician and Euskera This expansion and diversification of the database for studying language development is important because it creates new opportunities for testing theoretical claims Our contributors reconsider theoretical claims relating to the purported adult like nature of young children s grammars While some conclude for example that children in Mexico possess very adult like semantic pragmatic competence in the domain of the pragmatic implicatures associated with existential quantifiers others conclude that in particular sociolinguistic registers of Chilean Spanish children are late to develop adult like competence in plural marking Taken together the contents of the volume illustrate how the linguistic diversity found in the distinct learning conditions in which language develops offers a wealth of opportunities to further our understanding of linguistic and non linguistic cognitive development

The Role of Formal Features in Second Language Acquisition Juana M. Liceras, Helmut Zobl, Helen Goodluck, 2008 This edited volume dealing with formal features in Second Language Acquisition is defined within current generative grammatical theory such as the Principles and Parameters Theory and the Minimalist Program Formal features are essential to any account of language acquisition because they are basic components of lexical and functional categories This is a subject of much current research as evidenced by the number of published articles in journals and in conference proceedings This is what the editors say While L2 acquisition is the focus of our volume the papers address the role of features in the current versions of generative grammar and explore the role of features for learnability theory as it relates to native and non native acquisition To our knowledge the volume represents the first scholarly contribution specifically devoted to features in language acquisition There are many generativists in SLA including our two series editors Susan Gass and Jacquelyn Schachter When asked if the formalist bias will be a big detraction Jacquelyn said The formal features book will definitely be formalist in tone
