Computer Books and Serials in Print ,1985 *Corpora in Translator Education* Federico Zanettin,Silvia Bernardini,Dominic Stewart,2014-04-08 The use of language corpora as a resource in linguistics and language related disciplines is now well established One of the many fields where the impact of corpora has been growing in recent years is translation both at a descriptive and a practical level The papers in this volume which grew out of presentations at the conference Cult2k Bertinoro Italy 2000 the second in the series Corpus Use and Learning to Translate are principally concerned with the use of corpora as resources for the translator and as teaching and learning aids in the context of the translation classroom This book offers a cross section of research by some leading scholars in the field who offer accounts of first hand experience and theoretical insights into the various ways of building and using appropriate corpora in translation teaching for the benefit of teachers and learners alike The various contributions provide a rich source of inspiration for other researchers and practitioners concerned with corpora in translator education Contributors include Stig Johansson Tony McEnery Kirsten Malmkj r Jennifer Pearson Lynne Bowker Krista Varantola Belinda Maia and a number of other scholars

Grade Inflation Valen E. Johnson,2006-05-09 Grade inflation runs rampant at most colleges and universities but faculty and administrators are seemingly unwilling to face the problem This book explains why exposing many of the misconceptions surrounding college grading Based on historical research and the results of a yearlong on line course evaluation experiment conducted at Duke University during the 1998 1999 academic year the effects of student grading on various educational processes and their subsequent impact on student and faculty behavior is examined Principal conclusions of this investigation are that instructors grading practices have a significant influence on end of course teaching evaluations and that student expectations of grading practices play an important role in the courses that students decide to take The latter effect has a serious impact on course enrollments in the natural sciences and mathematics while the combination of both mean that faculty have an incentive to award high grades and students have an incentive to choose courses with faculty who do Grade inflation is the natural consequence of this incentive system Material contained in this book is essential reading for anyone involved in efforts to reform our postsecondary educational system or for those who simply wish to survive and prosper in it Valen Johnson is a Professor of Biostatistics at the University of Michigan Prior to accepting an appointment in Ann Arbor he was a Professor of Statistics and Decision Sciences at Duke University where data for this book was collected He is a Fellow of the American Statistical Association [Informatics in Schools: Improvement of Informatics Knowledge and](#)
