Kirkwood, 2021-08-15 The third edition of this widely popular textbook is authored by a master teacher This book provides a mathematically rigorous introduction to analysis of real valued functions of one variable This intuitive student friendly text is written in a manner that will help to ease the transition from primarily computational to

primarily theoretical mathematics The material is presented clearly and as intuitive as possible while maintaining mathematical integrity The author supplies the ideas of the proof and leaves the write up as an exercise The text also states why a step in a proof is the reasonable thing to do and which techniques are recurrent Examples while no substitute for a proof are a valuable tool in helping to develop intuition and are an important feature of this text Examples can also provide a vivid reminder that what one hopes might be true is not always true Features of the Third Edition Begins with a discussion of the axioms of the real number system The limit is introduced via sequences Examples motivate what is to come highlight the need for hypothesis in a theorem and make abstract ideas more concrete A new section on the Cantor set and the Cantor function Additional material on connectedness Exercises range in difficulty from the routine getting your feet wet types of problems to the moderately challenging problems Topology of the real number system is developed to obtain the familiar properties of continuous functions Some exercises are devoted to the construction of counterexamples The author presents the material to make the subject understandable and perhaps exciting to those who are beginning their study of abstract mathematics Table of Contents Preface Introduction The Real Number System Sequences of Real Numbers Topology of the Real Numbers Continuous Functions Differentiation Integration Series of Real Numbers Sequences and Series of Functions Fourier Series Bibliography Hints and Answers to Selected Exercises Index Biography James R Kirkwood holds a Ph D from University of Virginia He has authored fifteen published mathematics textbooks on various topics including calculus real analysis mathematical biology and mathematical physics His original research was in mathematical physics and he co authored the seminal paper in a topic now called Kirkwood Thomas Theory in mathematical physics During the summer he teaches real analysis to entering graduate students at the University of Virginia He has been awarded several National Science Foundation grants His texts Elementary Linear Algebra Linear Algebra and Markov Processes are also published by CRC Press Canadian Journal of Mathematics ,1971 *Mathematics Catalog 2005* Neil Thomson,2004-10 **Modern Matrix Algebra** David Ross Hill,Bernard Kolman,2001 A recapitulation of his earlier work Seeds of Contemplation this collection of sixteen essays plumbs aspects of human spirituality Merton addresses those in search of enduring values fulfillment and salvation in prose that is as always inspiring and compassionate A stimulating series of spiritual reflections which will prove helpful for all struggling to live the richest fullest and noblest life Chicago Tribune SIAM Journal on Computing Society for Industrial and Applied Mathematics,2001 **Children's Books in Print, 2007** ,2006 *Complete Solutions Manual for Poole's Linear Algebra* Robert Rogers,2003
