EXAMPLES

The NGO Factor in Africa

Maurice N. Amutabi, 2013-09-13 The book breaks new ground in understanding the role of Non Governmental Organizations NGOs in Africa The book historicizes NGOs using the Rockefeller Foundation as a case study looking at its tripartite paradoxical roles as an agent of colonialism globalization and development underdevelopment It deploys interdisciplinary devices to show how the RF projects have engaged in marginalization patronage and othering of African values and customs and the ensuing controversies Using globalization postmodern and postcolonial theories the book deconstructs the long held myths about NGO inviolability and opens ground for understanding their strengths It interrogates sites of contestation apprehension and possibilities that the RF has produced Using RF projects it looks at structures of hegemony race power class and gender that the RF has created The book illustrates the extent to which the RF has been instrumental in spreading capitalism imperialism in economic political cultural and social realms through globalization It desists from the grand narrative approach that has dominated African history in the past but instead gives agency and voice to those that have previously been marginalized

Stability and Change in Revolutionary

Pennsylvania George David Rappaport, 1996 *Stability and Change in Revolutionary Pennsylvania* examines the society and economy of Pennsylvania from about 1740 to 1790 the period that many historians have identified as formative in the making of modern America Did the Quaker province become truly modern during this period No says George Rappaport but he suggests that by 1790 modernization had begun Rappaport is almost unique among early American historians in his application of explicit social scientific models to historical evidence In the first part of the book he offers an analysis of Pennsylvania's social structure the families communities voluntary associations political parties and social classes that made up the social order He distinguishes among the economic political and social spheres and finds the simultaneous maturing of a traditional social order and the birth pangs of a modern one If the economy was not yet capitalist the political sector was strikingly modern The social sphere was a complex mix of informal and flexible social groupings social classes and voluntary associations that included firefighting companies immigrant aid societies and Benjamin Franklin's Junto In the second part of the book Rappaport uses his model of the social structure to develop an innovative analysis of the establishment of the Bank of North America America's first commercial bank in Philadelphia in 1781 In addition to exploring early banking Rappaport offers a pathbreaking narrative of the Constitutionalist Party's repeal of the act incorporating the bank and of the successful campaign led by Robert Morris and the bank's directors to survive the loss of the charter and then restore it He finds that the creation of commercial banks and the appearance of antibanking in the 1780s presages in significant ways the process of modernization America was to experience in the following centuries

Chall, 1998 **Journal of Asian-Pacific & World Perspectives**, 1979 *The Concept of Latin America in the United States* João Feres Júnior, João Feres, 2010 This book is a study of the semantics and usages of the concept of Latin America in the United States both in everyday language and in social scientific discourses Its guiding hypothesis is that Latin America has been historically defined in American English in opposition to a self-congratulatory image of the United States of America This constitutes in itself an act of misrecognition because it overlooks the ways those perceived as Latin Americans actually live their lives as political and social beings As a result of this practice Latin Americans have historically been ascribed the most contemptible characteristics and been treated in ways that suit the derogatory representations made of them The book also contains an original contribution to the debate about recognition Leaning on Reinhart Koselleck's notion of asymmetrical counterconcepts Feres Jr devises an original typology of forms of misrecognition and applies it to the analysis of discourses on Latin America This approach to the problem of recognition has many advantages in relation to the competing neo-Hegelian theory advocated by authors such as Axel Honneth and Charles Taylor it can be used as a tool to resist misrecognition without having to rely on a positive substantive conception of recognition Furthermore contrary to the neo-Hegelian approach it is able to address practices of misrecognition that have as an object people who are not part of the

national linguistic political community The book s narrative follows a chronological order in which discourses and theories about Latin America are placed in their historical context and examined in search of rhetorical strategies that perpetuate forms of misrecognition In the end Feres Jr demonstrates that long standing North American pejorative perceptions about the peoples and countries seen as Latin American found abundantly in everyday language survive in social scientific discourse despite the reiterated claims of objectivity and value neutrality of the social sciences The Changing Family
