Thompson,Thomas J. Volgy,2023-05-16 Political shocks have come to be considered highly salient for explaining major changes to international politics and to the foreign policies of states Such shocks can occur at all levels of analysis domestically dyadically regionally or globally They range from political phenomena such as coups and wars to ecological catastrophes These shocks are sufficiently disruptive to cause foreign policy makers to reconsider their foreign policy orientations and to contemplate major changes to their policies In fact some have argued that it is mostly through political shocks that fundamental policy change occurs in most states No wonder then that political shocks are now increasingly part of the toolbox of considerations used by foreign policy and international relations scholars as they focus on understanding patterns of conflict and cooperation between states Given the salience of political shocks to understand foreign policy change this book brings together a group of both senior and more junior scholars whose previous work has shown substantial promise for moving forward theory and empirical analysis Their combined efforts in this book highlight the value of multiple theoretical and empirical approaches to a clearer understanding of the nature of political shocks and their consequences for foreign policy and international politics **Sound & Vision** ,2006 *Journal of the Society of Motion Picture and Television Engineers* Society of Motion Picture and Television Engineers,1970 InfoWorld ,1997-09-15 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *Innovation Systems and Capabilities in Developing Regions* Willie Siyanbola,Olumuyiwa Olamide,2016-05-23 In today s knowledge driven world innovation and innovation systems have become key policy issues However the extent of knowledge that is available on these concepts in less developed countries is still relatively low Much of what we know about innovation theory and systems has come from the developed countries and reflects their world view This apparent knowledge deficit has major implications for less developed countries *Innovation Systems and Capabilities in Developing Regions* adds to the growing body of knowledge on developing countries The theoretical and empirical case studies presented here advance the notion that while developing countries may not engage in frontier research a critical knowledge base upon which these countries compete for global markets is emerging There is evidence that state and non state actors are increasingly emphasising policies that sit within the framework of national innovation systems This book

illuminates this shift in policy competence at national levels The contributions in this volume highlight the need for thorough understanding of the role of diffusion based innovation linked to technology transfer and acquisition They also provide empirical evidence on the drivers dynamics and impact of such innovation in developing economies and the constraints that apply Contributors also document the application of the innovation system approach in developing countries as well as the build up and diffusion of technological capabilities within innovation systems Academics higher level students policy makers and practitioners involved with innovation and the economics of technical change particularly in developing countries will find this a valuable book
