engineering at the outset of the 21st century as well as to commemorate the ASCE s Sesquicentennial Written by the leading
practitioners educators and researchers of civil engineering each of these peer reviewed papers explores a particular aspect
of civil engineering knowledge and practice Each paper explores the development of a particular civil engineering specialty
including milestones and future barriers constraints and opportunities The papers celebrate the history heritage and
accomplishments of the profession in all facets of practice including construction facilities special structures engineering
mechanics surveying and mapping irrigation and water quality forensics computing materials geotechnical engineering
hydraulic engineering and transportation engineering While each paper is unique collectively they provide a snapshot of the
profession while offering thoughtful predictions of likely developments in the years to come Together the papers illuminate
the mounting complexity facing civil engineering stemming from rapid growth in scientific knowledge technological
development and human populations especially in the last 50 years An overarching theme is the need for systems level
approaches and consideration from undergraduate education through advanced engineering materials processes
technologies and design methods and tools These papers speak to the need for civil engineers of all specialties to recognize
and embrace the growing interconnectedness of the global infrastructure economy society and the need to work for more
sustainable life cycle oriented solutions While embracing the past and the present the papers collected here clearly have an
