World Map W Maps Of The World:

Map of the World by Jodocus Hondius, 1611 Jodocus Hondius, 1907 *The World Map, 1300-1492* Evelyn Edson, 2007-07-15 A history of the development of world maps during the later medieval period in the centuries leading up to Columbus's journey. In the two centuries before Columbus, mapmaking was transformed. *The World Map 1300-1492* investigates this important transitional period of mapmaking. Beginning with a 1436 atlas of ten maps produced by Venetian Andrea Bianco, Evelyn Edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps. She finds that both the makers and users of maps struggled with changes brought about by technological innovation: the compass quadrant and astrolabe, rediscovery of classical mapmaking approaches, and increased travel. To reconcile the tensions between the conservative and progressive worldviews, mapmakers used a careful blend of the old and the new to depict a world that was changing and growing before their eyes. This engaging and informative study reveals how the ingenuity, creativity, and adaptability of these craftsmen helped pave the way for an age of discovery. A comprehensive and complex picture of the changing face of medieval geography. With the mastery of a formidable palette of historiographic knowledge and well-reasoned discussions of the sources, *The World Map 1300-1492* will certainly remain an important work to consult for both medieval and early modern scholars for many years to come. Ian J. Aebel, *Terrae Incognitae* *The Mapping of the World* Rodney W. Shirley, 1983 **To the Ends of the Earth** Jeremy Harwood, 2006 Focusing on 100 maps that changed human understanding of the world around us, changed the course of mapmaking, or directly influenced the path of history, this book reveals how different peoples have observed and represented their world through the ages and how maps have been used for a variety of purposes.
